# Contents

## *List of abbreviations*

### **Chapter 1**     ***Introduction: Myelin, myelination and myelin disorders: from development to pathology to repair***

### **Chapter 2**     ***Genetic defect of glial maturation***

1. Leukoencephalopathy with vanishing white matter: a review
2. Defective glial maturation in vanishing white matter
3. Hyaluronan accumulation and arrested oligodendrocyte progenitor maturation in vanishing white matter disease
4. Astrocytes are central in the pathomechanisms of vanishing white matter: evidence from novel mouse models

### **Chapter 3**     ***Genetic defects in astrocytic volume regulation***

1. Mice with megalencephalic leukoencephalopathy with cysts: a developmental angle
2. Brain white matter oedema due to CIC-2 chloride channel deficiency: an observational analytical study

### **Chapter 4**     ***Hypomyelination***

1. Clinical spectrum of 4H leukodystrophy caused by *POLR3A* and *POLR3B* mutations

### **Chapter 5**     ***Vascular and beyond***

1. A novel adult-onset dominant leukoencephalopathy and vascular accidents (ADLAVA)
2. Interferon- $\alpha$  and the calcifying microangiopathy in Aicardi-Goutières syndrome

**Chapter 6**      ***Summary and general discussion: Comparing and contrasting white matter disorders: a neuropathological approach to pathophysiology***

***Appendices***
