Contents

Chapter 1	General Introduction	7
Chapter 2	Dynamics of MRI phase in healthy aging	27
2.1	The effect of age on MRI phase behavior in the subcortical deep GM of healthy individuals	29
Chapter 3	Deep gray matter MRI phase in multiple sclerosis	53
3.1	Iron content of the pulvinar nucleus of the thalamus is increased in adolescent multiple sclerosis	55
3.2	Iron deposition on SWI-filtered phase in the subcortical deep gray matter of patients with clinically isolated syndrome may precede structure-specific atrophy	77
3.3	Gray matter SWI-filtered phase and atrophy are linked to disability in MS	95
Chapter 4	Detection of iron containing MS brain lesions using phase imaging	113
4.1	Iron deposition in multiple sclerosis lesions measured by susceptibility-weighted imaging filtered phase: a case control study	115
4.2	Phase white matter signal abnormalities in patients with clinically isolated syndrome and other neurologic disorders	139
Chapter 5	Discussion, summary and future perspectives	157
	Nederlandse samenvatting	177
	Acknowledgements	183
	List of publications	187
