CONTENTS

List of abbreviations

Chapter 1 General introduction

Chapter 2 Human macrophage polarization in vitro: maturation and activation methods compared

Chapter 3 Activation status of human microglia is dependent on lesion formation stage and remyelination in Multiple Sclerosis

Chapter 4 Macrophages in inflammatory Multiple Sclerosis lesions have an intermediate activation status

Chapter 5 Macrophages migrate in an activation-dependent manner to chemokines involved in neuroinflammation

Chapter 6 GM-CSF promotes migration of human monocytes across the blood-brain barrier

Chapter 7 Detailed pathology study comparing spinal cord and brain lesions in Multiple Sclerosis

Chapter 8 Optic nerve pathology in Multiple Sclerosis

Chapter 9 Macrophage activation in relation to neuronal damage and repair

Chapter 10 General discussion
