

TABLE OF CONTENTS

Part I	General introduction and outline of the thesis	13
Part II	Microvascular injury following primary percutaneous coronary intervention	
Chapter 1	Invasive measurement of coronary microvascular resistance in patients with acute myocardial infarction treated by primary percutaneous coronary intervention. <i>Heart. 2014 Jan;100(1):13-20.</i>	21
Chapter 2	Doppler-derived intracoronary physiology indices predict the occurrence of microvascular injury and microvascular perfusion deficits after angiographically successful primary percutaneous coronary intervention. <i>Circulation: Cardiovascular Interventions. 2015, Epub ahead of print.</i>	43
Chapter 3	Magnetic resonance imaging-defined areas of microvascular obstruction after acute myocardial infarction represent microvascular destruction and haemorrhage. <i>European Heart Journal. 2013 Aug;34(30):2346-53.</i>	75
Chapter 4	Coronary vasomotor function in infarcted and remote myocardium after primary percutaneous coronary intervention. <i>Heart. 2015 Oct 1;101(19):1577-83.</i>	95
Chapter 5	In vivo assessment of myocardial viability after acute myocardial infarction: a head-to-head comparison of the perfusable tissue index by PET and delayed contrast enhanced CMR. <i>Journal of Nuclear Cardiology, accepted for publication.</i>	115
Chapter 6	Kinetics of coagulation in ST-elevation myocardial infarction following successful primary percutaneous coronary intervention. <i>Submitted.</i>	135
Chapter 7	The role of ADAMTS13 in acute myocardial infarction: cause or consequence? <i>Submitted.</i>	155

Part III	Restoration of perfusion through collateral development	
Chapter 8	The coronary collateral circulation: genetic and environmental determinants in experimental models and humans. <i>Journal of Molecular and Cellular Cardiology. 2012 Apr;52(4):897-904.</i>	183
Chapter 9	A case of multiple coronary atresias: a rarity even within the family of coronary anomalies. <i>Eur Heart J. 2015 Aug 1;36(29):1936.</i>	203
Chapter 10	Clinical parameters associated with collateral development in patients with chronic total coronary occlusion. <i>Heart. 2013. Aug;99(15):1100-5.</i>	209
Chapter 11	Monoclonal antibody therapy against the Interferon-alpha/beta receptor subunit 1 stimulates arteriogenesis in a murine hindlimb-ischemia model without enhancing atherosclerotic burden. <i>Cardiovasc Res. 2015 Jul 15;107(2):255-66.</i>	227
Part IV	Summaries and future perspectives	
	English Summary	263
	Nederlandse Samenvatting	267
Part V	Appendices	
	Curriculum Vitae	273
	List of Publications	274
	Dankwoord	276
