Contents

Chapter 1  General introduction and thesis outline  9

Part I: Nerve Conduction Studies

Chapter 2  An easily applicable method for warming cold limbs in nerve conduction studies in bedridden patients.  31
Chapter 3  The segmental palmar test in carpal tunnel syndrome reassessed  47
Chapter 4  Comparison of peak versus onset latency measurements in electrodiagnostic tests for carpal tunnel syndrome  63
Chapter 5  Electrodiagnostic confirmation of carpal tunnel syndrome and especially the value of motor nerve conduction tests  79

Part II: Ultrasonography. An Alternative or Additional Test to Nerve Conduction Studies?

Chapter 6  Comparing a new ultrasound approach with electrodiagnostic studies to confirm clinically defined carpal tunnel syndrome.  97
Chapter 7  Ultrasonography in severe carpal tunnel syndrome  113
Chapter 8  Bifid median nerve in carpal tunnel syndrome: Do we need to know?  127

Chapter 9  Summary  153
General discussion and recommendations for future research  163

Chapter 10  Nederlandse samenvatting  179
