Contents

Chapter 1	General Introduction	9
Chapter 2	Compensatory fronto-parietal hyperactivation during set-shifting in unmedicated patients with Parkinson's disease	25
Chapter 3	Reduced task-related functional connectivity during a set-shifting task in unmedicated Parkinson's disease patients	47
Chapter 4	Decreased set-shifting performance, neural activity, and neural connectivity after inhibiting repetitive transcranial magnetic stimulation on the left dorsal prefrontal cortex	65
Chapter 5	Reduced neural connectivity but increased task-related activity during working memory in <i>de novo</i> Parkinson patients	87
Chapter 6	Failure of stop and go in <i>de novo</i> Parkinson's disease: a functional magnetic resonance imaging study	115
Chapter 7	Gray matter differences contribute to variation in cognitive performance in Parkinson's disease	135
Chapter 8	Cortical thickness, surface area and subcortical volume differentially contribute to cognitive heterogeneity in Parkinson's disease	149
Chapter 9	Summary and general discussion	165
	Nederlandse samenvatting	185
	References	195
	Dankwoord	211
	List of publications	215
	Curriculum Vitae	217
