## Colofon

The research described in this thesis was performed at the department of Psychiatry in collaboration with the EMGO institute for Health and Care Research (EMGO+). EMGO+ participates in the Netherlands School of Primary Care Research (CaRe) which was reacknowledged in 2005 by the Royal Netherlands Academy of Arts and Sciences (KNAW).

Financial support for publication of this thesis was kindly provided by:

Department of Psychiatry, VU University Medical Center, Amsterdam

Additional financial support of this thesis was kindly provided by:

Essentrics Workout

Fysio.com

This thesis was supported by a grant (August 2012) to Dr. Dekker for “Research in the Area of Pain” from the European League Against Rheumatism (EULAR). The infrastructure for the NESDA study ([www.nesda.nl](http://www.nesda.nl)) is funded through the Geestkracht program of the Netherlands Organisation for Health Research and Development (Zon-Mw, grant number 10-000-1002) and is supported by participating universities and mental health care organisations (VU University Medical Center, GGZ inGeest, Arkin, Leiden University Medical Center, GGZ Rivierduinen, University Medical Center Groningen, Lentis, GGZ Friesland, GGZ Drenthe, IQ Healthcare, Netherlands Institute for Health Services Research [NIVEL] and Netherlands Institute of Mental Health and Addiction [Trimbos]). Data analyses were supported by a Vidi grant (grant number 917.66.320, Dr. Penninx).
