Table of contents

Chapter 1	General introduction: Combining angiogenesis inhibition and radiotherapy: a double-edged sword.	7
Chapter 2	Aim and outline of the thesis.	31
Chapter 3.1	Examination of the role of galectins and galectin inhibitors in endothelial cell biology.	35
Chapter 3.2	Examination of the role of galectins during in vivo angiogenesis using the chick chorioallantoic membrane assay.	45
Chapter 4	Combining radiotherapy with sunitinib: Lessons (to be) learned.	59
Chapter 5	Optimal treatment scheduling of ionizing radiation and sunitinib improves the antitumor activity and allows dose reduction.	79
Chapter 6	Low dose angiostatic treatment counteracts radiotherapy-induced tumor perfusion and improves anti-tumor effect.	103
Chapter 7	Pilot study to determine the effect of fractionated radiotherapy on expression of pro-angiogenic factors in esophagus carcinoma.	129
Chapter 8	Fractionated radiation therapy activates type 1 interferon signaling in cancer cells via STING	143
Chapter 9	General discussion: challenges and opportunities.	169
	Summary	181
	Nederlandse samenvatting	185
	Curriculum Vitae	189
	Dankwoord	191
