# Table of contents

1. General introduction 1

**PART I: the hyper-resistance test**

2. Modeled neural and tissue muscle properties in CP 19

3. Motor-driven versus manual instrumented spasticity assessment in CP 35

**PART II: the interactive gait lab**

4. A comprehensive protocol to test instrumented treadmills 49

5. Calibration of instrumented treadmills using an instrumented stick 63

6. Self-paced versus fixed speed treadmill walking 79

7. Energy exchange between subject and treadmill 93

8. Virtual reality in different modes of treadmill walking 101

9. Effect of self-paced walking and virtual reality in CP 113

10. Treadmill versus overground: kinematic comparison in CP 127

11. Treadmill versus overground: kinetic comparison in CP 139

**PART III: the functional hyper-resistance test**

12. Stretch reflexes evoked by treadmill perturbations in calf muscles 151

13. General discussion 173

14. Summary 191

15. Samenvatting 195

16. Curriculum Vitae and & Publication List 199

17. Dankwoord 203
