CONTENTS

Preface	v
1. Overview of this Thesis	1
2. Simulation Optimisation: An Accelerated Stopping Rule for NPHA . . .	5
2.1 Problem Setting Simulation Optimisation	5
2.1.1 The Model	5
2.1.2 Literature Review	7
2.2 Background on Nested Partition Hybrid Algorithm	7
2.3 Accelerated Stopping Rule	10
2.3.1 General Idea	11
2.3.2 A Possible Theoretical Improvement	14
2.3.3 Numerical Experiments 1: an Academic Problem	17
2.3.4 Numerical Experiments 2: Buffer Allocation Problem	20
2.4 Conclusions	23
3. Risk Analysis of Generalized Jackson Networks	25
3.1 Introduction	25
3.2 Motivating Example	27
3.3 Literature Review and Related Work	31
3.4 Extended Jackson Networks	32
3.4.1 The Rerouting Regimes	32
3.4.2 Extended Traffic Equations	35
3.4.3 Long-Term Behaviour	41
3.4.4 Availability and Performance Measures	44
3.5 Robustness Analysis	46
3.6 Conclusion	53
4. Perturbation Bounds	55
4.1 Introduction	55
4.2 Perturbation Analysis	57
4.2.1 Preliminaries and Basic Definitions	57
4.2.2 Condition Number Perturbation Bounds for Finite Chains	63
4.2.3 The Choice of Norms in Perturbation Analysis	64
4.2.4 Perturbation Bounds	65
4.3 Explicit Perturbation Bounds for the Small Network (Finite State Space)	78
4.4 An Extensive Perturbation Analysis of a Queueing System	79
4.4.1 The Basic Model	80
4.4.2 Discussion of Literature	81

4.4.3	The Infinite Capacity $M/G/1$ Queue with Breakdowns (Denumerable State Space)	81
4.4.4	The $M/G/1/N$ Queue with Breakdowns (Finite State Space)	85
4.4.5	Discussion of Results	85
4.5	Conclusion	86
5.	The Jump Start Power Method	87
5.1	Introduction	87
5.2	A Brief Review of Markov Multi-Chains	89
5.3	A New Formula For The Ergodic Projector	92
5.4	The Jump Start Power Method	99
5.4.1	Motivating Numerical Experiments	99
5.4.2	Development of the Jump Start Power Method (JSPM)	102
5.4.3	JSPM for Large Markov Chains	107
5.5	Conclusion	110
6.	A Deviation Matrix Approximation and Applications	111
6.1	Introduction	111
6.2	A Social Network Example	112
6.3	A New Representation of the Deviation Matrix	118
6.4	Generalization of the Deviation Matrix Approximation	126
6.5	Decomposition of Markov Chains	128
6.5.1	Graph Derivatives of the Kemeny Constant	130
6.5.2	Decomposition Algorithm	131
6.5.3	Applications	133
6.6	Conclusion	136
7.	Ranking Nodes in General Networks	139
7.1	Introduction	139
7.2	Ranking for General Markov Chains	141
7.3	Real-Life Numerical Example	149
7.4	Conclusion	150
	Appendices	155
	A. Is a Smarter Allocation Rule for $\Pr(ACSR(k))$ Possible?	157
	B. Proofs of Jackson Network Results	165
B.1	Proof of Theorem 3.2	165
B.2	Proof of Theorem 3.3	168
	C. Proof of the Taboo Matrix Representation of the Deviation Matrix	173
	Summary	175
	Overview Own Publications	177
	Bibliography	179
