CONTENTS

Abbreviations	11
Chapter 1: Introduction	13
1.1 The savanna biome	14
1.1.1 Climate	14
1.1.2 Vegetation	15
1.1.3 Humans and fire	16
1.2 Satellite remote sensing	17
1.3 Objectives and outline	20
Chapter 2: Global changes in dryland vegetation dynamics (1988 – 2008) assessed by satellite remote sensing: comparing a new passive microwave vegetation density record with reflective greenness data	23
2.1 Introduction	24
2.2 Background theory	26
2.3 Materials	28
2.3.1 Normalized Difference Vegetation Index (NDVI)	28
2.3.2 Vegetation Optical Depth (VOD)	28
2.3.3 Additional data sets	29
2.3.3.1 Precipitation	29
2.3.3.2 Land cover	29
2.3.3.3 Fire	29
2.3.3.4 Livestock	29
2.4 Methods	30
2.4.1 Relationship between NDVI and VOD	30
2.4.2 Response of vegetation index anomalies to antecedent precipitation anomalies	30
2.4.3 Global dryland vegetation trends	31
2.5 Results	32
2.5.1 Relationship between NDVI and VOD	32
2.5.2 Response of vegetation index anomalies to antecedent precipitation anomalies	32
2.5.3 Global dryland vegetation trends	36
2.6 Discussion	40
2.6.1 Relationship between NDVI and VOD	40
2.6.2 Response of vegetation index anomalies to antecedent precipitation anomalies	42
2.6.3 Global dryland vegetation trends	42
2.6.3.1 Arid drylands ($0.1 < P/ET_p \leq 0.3$)	43
2.6.3.2 Semi-arid drylands ($0.3 < P/ET_p \leq 0.7$)	45
2.7 Conclusions	47

Chapter 3: Recent trends in African fires driven by cropland expansion and El Niño to La Niña transition	49
3.1 Introduction	50
3.2 Methods and data	51
3.3 Results and discussion	53
3.3.1 Model results	53
3.3.2 Precipitation induced burned area response	56
3.3.3 Impact of cropland encroachment on burned area	58
3.3.4 The impact of ENSO on burned area	61
3.4 Conclusions	62
Chapter 4: Biomass burning fuel consumption dynamics in the (sub)tropics assessed from satellite	65
4.1 Introduction	66
4.2 Data	68
4.2.1 MODIS burned area	68
4.2.2 SEVIRI FRP data	69
4.2.3 MODIS FRP data	69
4.2.4 Other data sets	70
4.3 Methods	71
4.3.1 Converting SEVIRI FRP to fuel consumption using laboratory measurements	71
4.3.2 Converting MODIS FRP to fuel consumption using in situ measurements	72
4.4 Results	74
4.4.1 Comparing SEVIRI and MODIS-derived fuel consumption	74
4.4.2 Converting MODIS FRP to fuel consumption using in situ measurements	75
4.4.3 Drivers and dynamics of fuel consumption	77
4.5 Discussion	79
4.5.1 Satellite-derived fuel consumption estimates	82
4.5.2 Drivers and dynamics of fuel consumption	84
4.6 Conclusions	87
Chapter 5: New fire diurnal cycle characterizations to improve fire radiative energy assessments made from MODIS observations	89
5.1 Introduction	90
5.2 Data	93
5.2.1 SEVIRI fire radiative power (FRP)	93
5.2.2 MODIS detection opportunity	94
5.2.3 MODIS Land cover	94
5.2.4 Fire size	94
5.3 Methods	95
5.3.1 Exploring the fire diurnal cycle	96

5.3.2	Sampling SEVIRI data at MODIS detection opportunities	97
5.3.3	Data assimilation	97
5.3.4	Persistent approach	98
5.3.5	Climatological approach	98
5.3.6	Model evaluation	99
5.4	Results	100
5.4.1	The diurnal cycle and MODIS sampling	100
5.4.2	Model evaluation	106
5.5	Discussion	109
5.5.1	Exploring the fire diurnal cycle using a Gaussian function	110
5.5.2	Model performance and the MODIS sampling design	111
5.6	Conclusions	114
Chapter 6: Summary		117
6.1	Introduction	118
6.2	Global changes in dryland vegetation dynamics	118
6.3	Recent trends in African burned area	119
6.4	Satellite-derived fuel consumption estimates	120
6.5	Fire diurnal cycle and emissions estimates	122
6.6	General conclusions and further research	123
Chapter 7: Samenvatting		127
7.1	Introductie	128
7.2	Onderzoek	129
7.3	Algemene conclusies en vooruitzichten	133
