List of abbreviations

ACSF:	artificial cerebro-spinal fluid	GluA2:	AMPA receptor subunit 2
AMPA:	α -amino-3-hydroxy-5-methyl-4-isoxazole-propionate	GluA3:	AMPA receptor subunit 3
AMPA:	AMPA receptor	GluA4:	AMPA receptor subunit 4
APV	(2R)-amino-5-phosphonovaleric acid	GluN1:	NMDAR subunit 1
CB	calbindin	GluN2:	NMDAR subunit 2
CB-IR	calbindin-immunoreactive	GluN3:	NMDAR subunit 3
CBP:	calcium-binding protein	LGN:	Lateral Geniculate Nucleus
CBP-IR:	CBP immunoreactive	MI:	modulation index
CR:	calretinin	MUA:	multi-unit activity
CR-IR:	calretinin-immunoreactive	MUAe:	MUA envelope
CNQX:	6-cyano-7-nitroquinoxaline-2,3-dione	MUAs:	MUA spiking
CSD	current-source density	NA:	numerical aperture
FB:	feed-back	NMDA:	N-Methyl-D-aspartic acid
FF:	feed-forward	NMDAR:	NMDA receptor
FGM:	figure-ground modulation	PV:	parvalbumin
GABA:	gamma amino butyric acid	PV-IR:	parvalbumin-immunoreactive
GluA1:	AMPA receptor subunit 1	SUA:	single-unit activity
		V1:	primary visual cortex

Thank you

Tijn & Noor. For existing.

Pieter Roelfsema. For being my boss. You have taught me to be professional and to strive to achieve my potential even when I found it difficult. I believe I am now a better researcher, and a more mature, responsible person.

Matt Self. For your unwavering sense of humour and common sense. Also for putting up with me.

The Roelfsema Lab. For all the fun and all the science.

Dev. For the never-ending arguments. Live long and prosper.

Ulf Schnabel. For being so inspiringly dedicated and focused. Remember to always think Science thoughts.

Chris Klink. For bringing back sarcasm to the group. Also, you make ridiculously awesome beer, and labels.

Corbert van Eden. For the eternal enthusiasm for science done right.

Kor Brandsma. For being so kind and unapologetically grumpy at the same time. For your competence. Also for all the vegetables.

Jan Klooster. For being my friend. Now it's on paper. Also for the lab drawer. The one finger salute.

Tini Eikelboom. For all the understanding and support.

Floris Wouterlood & Jeoren Beliën. For being my partners in cell counting. This work would have never been possible without you.

Uwe Heinemann. For being my first mentor and my science family. Despite not the always-great circumstances, I could always depend on you. You will be greatly missed. I will pass the kindness on.

My students. For all the hours. There have been many of you, and you each have a special place in my work and in my heart. I hope you all find fulfilment in your personal and professional lives.

Theodora Voitcu. For being so overexcited over my name being on PubMed, doctor.

Josefine Osman. For always finding the sunshine, even in the darkest hour.

Journal publications
