## Acknowledgements

I would like to express my thanks to my PhD promotor, Joske Bunders, who gave me this opportunity. My highest qualification was a Diploma of Pharmacy, but Joske believed I was capable of completing a PhD. Richard Laing, Dennis Ross-Degnan and Tim Reed also supported my application. I will never forget their faith in me. I would also like to thank Joske, Marjolein Zweekhorst and Barbara Regeer for their guidance and encouragement through the PhD programme.

I especially want to acknowledge Richard Laing who has taught me so much about pharmaceutical policy and undertaking research. A special thank you to two others whom I have also worked closely with for many years: Ali Cameron (on the WHO/HAI pricing project) and David Beran (on the ACCISS Study). Together with Richard, we have worked hard and achieved a lot.

I wish to thank all the national research teams who have collected the data, and allowed me to include it in the database. Their efforts have greatly enriched our knowledge on medicine prices, availability and affordability in LMICs.

Finally, but very importantly, thank you to Tim Reed at HAI for always being there when I needed help.
