Contents

Acknowledgements	i
1 Introduction	1
2 Forecasting U.S. Inflation Using Phillips Curve Model	7
2.1 Introduction	7
2.2 Forecasting models and methodology	9
2.2.1 Forecasting models	9
2.2.2 Extracting information from Large Data Sets	14
2.3 Empirical study	15
2.3.1 Data	15
2.3.2 Design of Empirical Study	16
2.3.3 Empirical Results	18
2.4 Conclusion	28
2.5 Extra Tables	29
3 Weighted Maximum Likelihood Estimation with Optimal Forecasting Accuracy: Forecasting During the Global Recession	41
3.1 Introduction	41
3.2 Basic Concepts	43
3.3 WMLE for Autoregressive Models	47
3.3.1 The WMLE	47
3.3.2 Special Classes of Weights	48
3.3.3 Estimation of Optimal Weights by Cross-Validation	49
3.4 Theoretical Foundations for the Weighted MLE	51
3.5 Simulation Experiment	55
3.5.1 Experiment 1: Time-Invariant AR(1) model	56

3.5.2	Experiment 2: Time-varying AR(1) model	57
3.5.3	Experiment 3: AR(1) Model with a Structure Break	59
3.5.4	Experiment 4: regime-switching AR(1) model	61
3.6	Empirical Applications	62
3.6.1	Forecasting IPI During the Global Recession	63
3.6.2	Using WMLE During the Expansion Period	65
3.6.3	Using WMLE on Other Data Sets	67
3.7	Conclusion	67
3.8	Proofs of Theorems and Propositions	68
3.9	Extra Tables	70
4	Weighted Maximum Likelihood for Dynamic Factor Analysis and Forecasting with Mixed Frequency Data	75
4.1	Introduction	75
4.2	Weighted Maximum Likelihood: method and properties	78
4.2.1	Weighted Maximum Likelihood Estimator	80
4.2.2	Asymptotic Properties of the WML Estimator	82
4.2.3	Selecting Optimal Weights	86
4.2.4	Small Sample Properties of WML: A Monte Carlo Study	88
4.3	Mixed frequency dynamic factor model	90
4.3.1	Low versus high frequency updating	90
4.3.2	Low versus high frequency updating: computing times	93
4.3.3	Mixed frequency dynamic factor model: low frequency updating	94
4.4	Empirical study: forecasting U.S. GDP growth	96
4.4.1	Data	97
4.4.2	Design of the empirical study	97
4.4.3	Empirical results: forecast performance	99
4.4.4	Empirical results: relative forecast performance	100
4.5	Conclusions	102
5	Summary	105
	Bibliography	107
	Appendix A Deviations of Chapter 4	113
A.1	Proofs of Theorems and Propositions	113
A.2	Low frequency formulations for autoregressions	120
A.3	Interpolation and Aggregation Approaches	126
