# Table of Contents

1 General Introduction 9  
1.1 General 10  
1.2 Historical Overview 10  
1.3 Scope and Outline of this Thesis 16  

2 Catalytic Cycle of Cytochromes P450 19  
2.1 General 20  
2.2 Structure of Cytochrome P450 Enzymes 20  
2.3 The Catalytic Cycle of Cytochrome P450 Enzymes 21  
2.4 Cytochrome P450 Compound I 28  
2.5 Stereochemical Scrambling and Radical Clock Substrates 30  
2.6 Carbocationic Intermediates and Multiple Oxidants 33  
2.7 Site-Directed Mutagenesis 37  
2.8 Theoretical Interpretation of the P450 mechanisms 40  
2.9 Concluding Remarks 47  

3 Methods and Validation of Density Functionals 49  
3.1 General 50  
3.2 DFT Functionals 52  
3.3 Results and Discussion 53  
3.4 Conclusions 59  
3.5 Computational Details 60  

4 The Electronic Ground State of Iron Porphyrin 61  
4.1 General 62  
4.2 Results and Discussion 64  
4.3 Conclusions 69  
4.4 Computational Details 69  

5 Distortions in Unligated and Ligated Iron Porphyrins 71  
5.1 General 72  
5.2 Results and Discussion 75  
5.3 Conclusions 86  
5.4 Computational Details 86
