Contents

Preface *vii*

1 Introduction *1*

- 1.1 Research questions *4*
- 1.2 Topics *5*
- 1.3 Overview *8*

2 Theoretical background *11*

- 2.1 Cities in the context of innovation and agglomeration *11*
- 2.2 Agglomeration, innovation and growth *12*
 - 2.2.1 Innovation, productivity, growth *13*
 - 2.2.2 Localization and urbanization *14*
 - 2.2.3 Marshall, Porter and Jacobs effects *15*
- 2.3 From a regional to a firm perspective *18*
- 2.4 Modelling agglomeration externalities and growth *22*
 - 2.4.1 Knowledge *23*
 - 2.4.2 Regions *25*
 - 2.4.3 Extensions *27*
- 2.5 Innovation *28*

3	Agglomeration effects: a meta-analysis	33
3.1	Introduction	33
3.2	Estimating agglomeration economies	35
3.2.1	Glaeser's model	36
3.2.2	Selection and characterisation of studies	39
3.3	Meta-analysis	40
3.3.1	Vote counting	40
3.3.2	Meta-regression analysis	42
3.4	Conclusions	52
3.A	Appendix: Studies included	55
3.B	Appendix: Ordered probit	58
3.C	Appendix: Marginal effects	60
3.D	Appendix: Robustness test	64
4	Regional wage differences in the Netherlands: micro-evidence on agglomeration externalities	65
4.1	Introduction	65
4.2	Sources of regional wage differences	66
4.3	Data and methodology	68
4.4	Agglomeration variables	71
4.4.1	Specialization	71
4.4.2	Competition	74
4.4.3	Diversity	75
4.5	Estimation of the Mincer equation	77
4.6	Explanation of the spatial residual	83
4.7	Aggregated data	87
4.8	Conclusions	90
5	The influence of firm characteristics vs. regional externalities on innovation	91
5.1	Introduction	91
5.2	Data	95
5.3	Analysis	102
5.3.1	Internal factors	102
5.3.2	Internal and external factors	108
5.4	Conclusions	111

6	Stocking up: the influence of past innovativity in a region	113
6.1	Introduction	113
6.2	Theoretical background	115
6.2.1	Endogenous growth modelling	115
6.2.2	Defining boundaries	116
6.2.3	R&D stocks	119
6.3	Data	121
6.4	Analysis	124
6.5	Conclusions	132
6.A	Appendix: Questionnaire excerpt	135
6.B	Appendix: Additional regressions	137
6.C	Appendix: Alternative approach	139
7	Conclusions	143
7.1	Results	143
7.2	Implications and further research	146
Appendix A. NUTS-3 (Corop) classification		150
Appendix B. Pavitt and other sectoral classifications		152
Appendix C. Regional distribution of Pavitt sectors and R&D in the Netherlands		154
Samenvatting (in Dutch)		157
Reference list		163

List of Figures

1.1	'Pieken in de Delta'	3
1.2	Composition of employment by province	7
1.3	Overview of the structure of this dissertation	9
2.1	The dynamics of agglomeration externalities and interregional equilibrium	26
3.1	Vote counts	41
3.2	Predicted vs. actual outcomes for non-sectoral estimates	53
3.B.1	Interpretation of an ordered probit	59
3.D.1	Coefficients and standard errors	64
4.1	Indexed average hourly wages	70
4.2	Non-linear effect of age	81
4.3	Estimated effect of some dummy variables on wage	81
4.4	Average spatial residual by NUTS-3 area	82
4.5	Results for agglomeration variables when urbanization controls are not included	88
4.6	Results for agglomeration variables when urbanization controls are included	88
5.1	Diversity in the 40 NUTS-3 regions of the Netherlands	99
5.2	Urbanization in the Randstad area	110
6.1	Population density in the Netherlands	123
6.2	Travel time bands around postcode 1011 (central Amsterdam)	124
6.3	Travel time bands around postcode 9611 (Sappemeer)	124
6.C.1	100 postcode areas nearest to 1011 (central Amsterdam)	140
6.C.2	100 postcode areas nearest to 9611 (Sappemeer)	141
6.C.3	Histogram of distances from the 100th nearest postcode to the core	142
A.1	Corop areas in the Netherlands	151

List of Tables

3.1	The effect of agglomeration externalities on employment	37
3.2	Vote counts	41
3.3	Meta-regression analysis	46
3.4	Meta-regression analysis (preferred specification)	48
3.5	Goodness of fit for Tables 3.3 and 3.4	51
3.A.1	List of included studies and number of meta-observations	55
3.C.1	Marginal effects for specialization	61
3.C.2	Marginal effects for competition	62
3.C.3	Marginal effects for diversity	63
4.1	Simple correlations at NUTS-3 level	79
4.2	Mincer regression	80
4.3	Mincer regression including industry×region dummies	84
4.4	Explaining the spatial residual	85
4.5	Correlations between agglomeration variables	86
4.6	Explaining regional productivity differences	89
5.1	Descriptive statistics for the CIS variables	97
5.2	Innovation across Pavitt sectors	101
5.3	Probit results: firm variables only	103
5.4	Probit results: both firm and agglomeration variables	104
5.5	Dummy variable results for Tables 5.3 and 5.4	107
6.1	Main results	127
6.2	Results with R&D stocks at different levels of sectoral aggregation	128
6.3	Results for selected Pavitt sectors	131
6.4	Results for single dimensions and combinations	133
6.B.1	Results by size class of the firm	138
B.1	Pavitt sectors, macrosectors, and SBI sectors	153
C.1	Distribution of Pavitt sectors over the Dutch provinces	155
C.2	Distribution of R&D over the Dutch provinces	155
