Table of contents

1. Background and research questions.....	1
1.1. Introduction.....	1
1.2. Well-being.....	3
The concept and measurement of well-being	3
Development of well-being in young adulthood	5
1.3. Trends in the relationship domain	6
Explaining the declining marriage rate.....	7
1.4. Effects of relationship transitions on subjective well-being.....	10
Effects of entering into a relationship on well-being.....	10
Differences between types of relationship.....	11
Effects of union dissolution and repartnering on well-being.....	13
Long-term effects of relationships on well-being.....	14
1.5. Explaining the effects of relationship transitions on well-being	14
Causation	14
Conservation of resources theory	16
Selection	17
Explaining long-term effects: The set-point theory	18
1.6. Unions in their national context.....	21
1.7. Design and data.....	23
Longitudinal panel study	23
Cross-national comparative data.....	26
1.8. Outline of the dissertation.....	27
2. Patterns of subjective well-being, personality and family transitions in young adulthood.....	29
Abstract.....	29
2.1. Introduction.....	29
2.2. Theory and previous research.....	30
Perspectives on changes in well-being across the life-course	30
Determinants of subjective well-being	34
2.3. Method.....	38
Sample	38
Measurement.....	38
Analytical approach	42
2.4. Results.....	42
Descriptive results	42
The mean level of subjective well-being	45
2.5. Discussion.....	49

3.	Together is better? Effects of relationship status and resources on young adults' well-being.....	53
	Abstract.....	53
3.1.	Introduction.....	53
3.2.	A resources theory on well-being and partner relationships.....	55
	Resources and partner relationships	56
	Living together	58
	Marriage.....	59
	Moderating effects of resources.....	60
	Gender differences.....	60
3.3.	Method.....	61
	Sample	61
	Measurement.....	62
	Analytical strategy	64
3.4.	Results.....	65
	Descriptive results	65
	Relationship status and well-being	67
	Mediating effects	69
	Moderating effects.....	70
3.5.	Discussion.....	71
4.	The long-term consequences of relationship formation for subjectivewell-being.....	75
	Abstract	75
4.1.	Introduction.....	75
4.2.	Theory and hypotheses	77
	Transitions into and out of a relationship	77
	Adaptation.....	79
	Life course	82
	Gender differences.....	82
4.3.	Method.....	83
	Panel study on social integration in the Netherlands.....	83
	Measurement.....	84
	Analytical strategy	86
4.4.	Results.....	89
	Descriptive results	89
	Results from multilevel regression models.....	89
4.5.	Discussion.....	97

5. Is marriage more than cohabitation? Well-being differences in 30 European countries	101
Abstract.....	101
5.1. Introduction.....	101
5.2. Theoretical background	102
Selection factors.....	103
Institutionalisation	105
5.3. Method.....	107
Sample	107
Dependent variable: Well-being	107
Individual level predictors	108
Country level predictors	109
Analysis	114
5.4. Results.....	115
Descriptive statistics	115
Multilevel regression models.....	116
5.5. Discussion.....	118
6. Conclusion and discussion.....	129
6.1. Research questions.....	129
6.2. The development of well-being	131
Summary of findings.....	131
Discussion of findings.....	132
6.3. The effects of relationship transitions on well-being.....	133
Summary of findings.....	133
Discussion of findings.....	134
6.4. Factors explaining relationship effects	137
Summary of findings	138
Discussion of the findings.....	140
6.5. The national context and effects of unions on well-being	141
Summary of findings.....	141
Discussion of findings.....	142
6.6. Implications for theories about relationships and well-being.....	143
Conservation of resources theory	143
Set-point theory	145
6.7. Main conclusions	147
6.8. Limitations and suggestions for further research.....	148
References.....	151
Nederlandse samenvatting	169
Onderzoeksvragen en maatschappelijk kader.....	169
Data.....	172

Meting van welbevinden.....	172
De ontwikkeling van welbevinden in de jongvolwassenheid.....	173
Effecten van relatietransities op welbevinden	175
Factoren die effecten van relatietransities op welbevinden verklaren	177
Relaties in een internationale context	180
Conclusies.....	181
Curriculum Vitae.....	183

List of tables and figures

Figure 1.1. Proportion of people who are, or have been in unmarried cohabitation as a proportion of the total number of people who live together with a partner, in Europe and the Netherlands by birth cohort (1900-1980).....	9
Table 1.1. Characteristics of PSIN waves	25
Table 2.1. Scores of template patterns: Deviations from average.....	40
Table 2.2. Descriptives results per pattern of life satisfaction	43
Table 2.3. OLS regression models with mean SWB level as dependent variable and personality and family transitions as predictors	46
Table 2.4. Model 2A: Multinomial logistic regression to test the effect of personality and relationship variables on the pattern of life satisfaction with interaction effects. The stable pattern is the reference pattern.....	47
Table 2.5. Model 2B: Multinomial logistic regression to test the effect of personality and relationship variables on the pattern of life satisfaction with interaction effects. The stable pattern is the reference pattern.....	48
Figure 3.1. Cumulative distribution of relationship status by age	63
Table 3.1. Descriptives of dependent and independent variables by relationship status	66
Table 3.2. Unstandardised regression coefficients and standard errors for the effects of relationship status and resources on life satisfaction.....	68
Table 4.1. Descriptives of dependent and independent variables by relationship status	88
Table 4.2. Mean well-being scores (1-7) by wave and relationship status.....	92
Table 4.3. Estimated unstandardised coefficients of multilevel regression models measuring within-person effects on well-being (1-7)	94
Figure 4.1. Predicted life satisfaction of young adults with three fictitious relationship careers.....	96
Table 5.1. Descriptives of individual unstandardised variables by country and type of union.....	110
Table 5.2. Descriptives of unstandardised country variables.....	119
Table 5.3. Multilevel regression models with individual and country variables predicting well-being (0 - 10)	120
Figure 5.1. Institutionalization of cohabitation is negatively related to the cohabitation gap in European countries	125
