Affiliations Co-authors

The research presented in this thesis has been performed by multiple authors. The names of the authors are mentioned in alphabetical order, indicating that each of the authors has contributed an equal share to the work involved. Below you can find the affiliations of the co-authors.

Tibor Bosse is an assistant professor at the department of Artificial Intelligence at VU University Amsterdam. His main research interests are agent based modelling, cognitive modelling and ambient intelligence.

Henk Elffers is a senior researcher at the Netherlands Institute for the Study of Crime and Law Enforcement. His main research interests are quality of criminological data and the rational choice theory with respect to the behaviour of potential offenders, specifically in spatial context. Moreover, he is a professor Empirical Study of Law Enforcement at the Law Faculty of VU University Amsterdam.

Mark Hoogendoorn is an assistant professor at the department of Artificial Intelligence at VU University Amsterdam. His main research interests are agent based modelling, organisational modelling and ambient intelligence.

S. Waqar Jaffry is a Ph.D. student at the department of Artificial Intelligence at VU University Amsterdam. His main research interests are multi agent systems, free and open source software technologies, and technology in education.

Michel C.A. Klein is an assistant professor at the department of Artificial Intelligence at VU University Amsterdam. His main research interest is intelligent support for humans, also called human ambience.

Jan Treur is a full professor at the department of Artificial Intelligence at VU University Amsterdam. His main research interests include ambient intelligence, agent systems, cognitive modelling, biological modelling, organisational modelling, philosophy of mind, verification and validation, and logical foundations.

Frank M. Weerman is a senior researcher at the Netherlands Institute for the Study of Crime and Law Enforcement. His main research interests are juvenile delinquency and the role of peers and social networks therein.
Acknowledgments

When I started writing the acknowledgment section I soon filled more pages than are present in the conclusion of the thesis. Since this would be a bit awkward I started over, but it indicates that I am very grateful to many people.

The person I would like to thank first and foremost is Jan Treur. Jan has given me an opportunity of a lifetime. He initiated the interdisciplinary project on the intersection of AI and Criminology and gave me the chance to prove myself despite the fact that I did not have a background in AI. The opportunity to work on this project absolutely changed my life.

Secondly, I would like to thank Michel Klein. Michel has been one of my daily supervisors. Our regular meetings definitely helped me gain self-confidence, focus on the main line in my research and helped me prepare for the defense of my thesis.

Moreover, I would like to thank the committee members, Annette ten Teije, Catholijn Jonker, Frank Weerman, Henk Elffers and Lin Liu for the time they spent on reading my thesis and providing feedback. This definitely improved the quality of my work.

These past years at the VU were absolutely fantastic. I always enjoyed going to work because we have so much fun with our group. I will never forget all the outings we had, including going for dinner, bowling, dancing, celebrating Sinterklaas, and the famous Russian night. And of course, the many conferences we attended together were the icing on the cake. I have made friends for life and would like to thank Annerieke, Arlette, Azizi, Ghazanfar, Matthijs, Natalie, Nataliya, Peter-Paul, Robbert-Jan, Umair, Vera, Waqar, and Zulfiquar for this wonderful time. I would especially like to thank Alexei, Fiemke, Mark and Rianne for being the best friends anyone could wish for.

Next I want to thank all my friends and family for supporting me through the years, even while they absolutely did not have a clue on what I was doing. I especially would like to thank my mother for always being willing to bring us to and from Schiphol when visiting a conference (even when it was in the middle of the night or when there was a weather alarm), my sister for being such a lovely paranymph, and Mies for all the fun we had together.

Last but not least, I would like to thank Tibor. Tibor could have been mentioned in almost all of the categories mentioned above. He has been one of my daily supervisors and always took the time to explain every little detail if necessary; he is a colleague, a friend and my paranymph, but most importantly he is the love of my life. Having him by my side inspires me to reach new heights.

2009-16  Fritz Reul (UvT)
   New Architectures in Computer Chess

2009-17  Laurens van der Maaten (UvT)
   Feature Extraction from Visual Data

2009-18  Fabian Groffen (CWI)
   Armada, An Evolving Database System

2009-19  Valentin Robu (CWI)
   Modeling Preferences, Strategic Reasoning and Collaboration in Agent-Mediated Electronic Markets

2009-20  Bob van der Vecht (UU)
   Adjustable Autonomy: Controlling Influences on Decision Making

2009-21  Stijn Vanderlooy (UM)
   Ranking and Reliable Classification

2009-22  Pavel Serdyukov (UT)
   Search For Expertise: Going beyond direct evidence

2009-23  Peter Hofgesang (VU)
   Modelling Web Usage in a Changing Environment

2009-24  Annerieke Heuvelink (VUA)
   Cognitive Models for Training Simulations

2009-25  Alex van Ballegooij (CWI)
   "RAM: Array Database Management through Relational Mapping"

2009-26  Fernando Koch (UU)
   An Agent-Based Model for the Development of Intelligent Mobile Services

2009-27  Christian Glahn (OU)
   Contextual Support of social Engagement and Reflection on the Web

2009-28  Sander Evers (UT)
   Sensor Data Management with Probabilistic Models

268
2009-29  Stanislav Pokraev (UT)
Model-Driven Semantic Integration of Service-Oriented Applications

2009-30  Marcin Zukowski (CWI)
Balancing vectorized query execution with bandwidth-optimized storage

2009-31  Sofiya Katrenko (UVA)
A Closer Look at Learning Relations from Text

2009-32  Rik Farenhorst (VU) and Remco de Boer (VU)
Architectural Knowledge Management: Supporting Architects and Auditors

2009-33  Khiet Truong (UT)
How Does Real Affect Affect Recognition In Speech?

2009-34  Inge van de Weerd (UU)
Advancing in Software Product Management: An Incremental Method Engineering Approach

2009-35  Wouter Koelwijin (UL)
Privacy en Politiegegevens; Over geautomatiseerde normatieve informatie-uitwisseling

2009-36  Marco Kalz (OUN)
Placement Support for Learners in Learning Networks

2009-37  Hendrik Drachsler (OUN)
Navigation Support for Learners in Informal Learning Networks

2009-38  Riina Vuorikari (OU)
Tags and self-organisation: a metadata ecology for learning resources in a multilingual context

2009-39  Christian Stahl (TUE, Humboldt-Universitaet zu Berlin)
Service Substitution -- A Behavioral Approach Based on Petri Nets

2009-40  Stephan Raaijmakers (UvT)
Multinomial Language Learning: Investigations into the Geometry of Language

2009-41  Igor Berezhnyy (UvT)
Digital Analysis of Paintings

2009-42  Toine Bogers (UvT)
Recommender Systems for Social Bookmarking

2009-43  Virginia Nunes Leal Franqueira (UT)
Finding Multi-step Attacks in Computer Networks using Heuristic Search and Mobile Ambients

2009-44  Roberto Santana Tapia (UT)
Assessing Business-IT Alignment in Networked Organizations

2009-45  Jilles Vreeken (UU)
Making Pattern Mining Useful

2009-46  Loredana Afanasiev (UvA)
Querying XML: Benchmarks and Recursion

2010-01  Matthijs van Leeuwen (UU)
Patterns that Matter

269
