Contents

Preface	9
Chapter 1. Introduction	11
Chapter 2. Aims and Method of this Study	17
2.1. Introduction	17
2.2. Aims of Philosophy of Science	17
2.2.1. The Distinction between Discovery and Justification	18
2.2.2. Characterizing Science by its Values	22
2.3. Methodology in Philosophy of Science	26
2.4. Reflections on the Specific Method Used in this Study	29
Chapter 3. Understanding Scientific Understanding	33
3.1. Introduction	33
3.2. Scientific Understanding and Explanation	35
3.3. Basic Ideas of My Account of Scientific Understanding	37
3.4. Applying Theories to Phenomena	41
3.4.1. The Transition from the Syntactic to the Semantic View of Theories	41
3.4.2. Representational Views of Models Based on Scientific Practice	43
3.4.3. Giere's Representational View of Models	46
3.5. Intelligibility as an Epistemic Condition for the Successful Application of Models	51
3.6. Key Notions and Key Questions	56
Chapter 4. The Virtue of Surplus Meaning: Neo-Behaviorism	57
4.1. Introduction	57
4.2. The Meaning and Use of Theoretical Terms in Neo-Behaviorism	58
4.2.1. Operational Definitions and the Meaning of Theoretical Terms	61

4.2.2.	Edward C. Tolman and the Intervening Variable . . .	64
4.2.3.	Clark L. Hull and the Application of Theoretical Terms in Different Domains	77
4.3.	The 1950s Dispute on Theoretical Terms and their Surplus Meaning	92
4.3.1.	Intervening Variables and Hypothetical Constructs	94
4.3.2.	The Merits of Using Theoretical Terms with Surplus Meaning	98
4.3.3.	The Nature of the Surplus Meaning of Psychological Concepts	106
4.4.	The Epistemic Significance of Surplus Meaning	110
Chapter 5. Skills for Understanding: Cognitive Psychology . . .		113
5.1.	Introduction	113
5.2.	A Brief Review of the Rise of Cognitive Psychology	114
5.3.	Applying Information-Theoretical Models in Cognitive Psychology	117
5.3.1.	Information Theory	117
5.3.2.	Experiments on the Capacity of Human Information Transmission	119
5.3.3.	The Non-Trivial Application of Information-Theoretical Models	124
5.3.4.	The Skill of Conceptualizing and the Role of Metaphors	132
5.4.	The Information-Theoretical Approach at Work: Donald E. Broadbent's Account of Attention	139
5.4.1.	Broadbent's Conceptual Framework	142
5.4.2.	The Filter Theory of Attention	146
5.4.3.	The Introduction of Flow Charts	151
5.4.4.	The Mechanical Model for Attention	153
5.4.5.	Analogies between the Mechanical Model and the Phenomenon of Attention	157
5.5.	Relevant Skills for Successfully Applying Models to Phenomena	163
Chapter 6. Conclusion		165
6.1.	Is the intelligibility of models an epistemic value and how does it function in scientific practice?	165

6.2. What kinds of skills are required for the successful application of a scientific model to a phenomenon?	167
6.3. Which kind of virtues can render a model intelligible to its users?	168
6.4. On what kind of pragmatic and contextual factors does intelligibility depend?	168
6.5. Is the characterization of science advocated in this study useful for the explanatory and normative tasks of philosophy of science?	170
