Dankwoord

Dit proefschrift zou nooit tot stand zijn gekomen zonder de hulp en betrokkenheid van een aantal mensen die ik dan ook graag wil bedanken.

Jan, jij uiteraard als eerste bedankt. Je enorme enthousiasme voor de wetenschap en de energie waarmee je die wetenschap bedrijft hebben ervoor gezorgd dat werken met jou altijd een groot plezier was. Bedankt voor de vier leuke jaren die ik in je lab heb meegemaakt en voor alles wat je me hebt geleerd.

Dirk, ook jij heel erg bedankt voor de hulp en begeleiding bij alle projecten die we hebben gedaan. FMRI analyses bleken heel wat complexer te zijn dan ik in eerste instantie dacht, maar gelukkig wist je me altijd duidelijk uit te leggen hoe ik me een weg door de data heen moest banen.

Iedereen van de afdeling cognitieve psychologie (inclusief Barbara en alle oud collega's): bedankt voor de vier enorm gezellige jaren. Een paar mensen wil ik nog even persoonlijk bedanken: Manon, een betere kamergenoot had ik me niet kunnen wensen. Bedankt voor alle interessante discussies en mijn wekelijkse portie vitamines. Thomas en Erik, laten we nog vaak gaan boarden/skiën (pas wel op voor de lift!). Clayton en Wieske, bedankt voor jullie gastvrijheid op menig pokeravondje/etentje.

De leden van de lees/promotiecommissie voor de bereidheid tot het lezen van mijn proefschrift.

Mijn paranimfen Bart en Aurelia bedankt voor de werkelijk enorme berg werk die jullie hebben verzet in de aanloop naar mijn promotie.

I would also like to thank the people from the Center for Mind and Brain in Davis California, especially Professor Ron Mangun, for the great 5 months that I visited your lab.

Jan Willem, jij bedankt voor het ontwerpen van de omslag en je bereidheid om me te allen tijde te helpen met het maken van figuren voor mijn experimenten en papers.

Ouders, bedankt dat ik altijd mijn eigen weg heb mogen kiezen en dat jullie altijd achter me staan.

Margot, bedankt voor al je steun de afgelopen jaren. Zonder jou was het niet gelukt.

Curriculum Vitae

Jaap Munneke was born on April 18, 1978 in Veendam, the Netherlands. In 2004 he received his Master's degree in cognitive psychology at the University of Groningen on the topic of temporal aspects of attention and ERPs. After his graduation he worked as a research assistant at the department of social psychiatry at the University Medical Center in Groningen. In March 2006 he started working as a Ph.D student in the lab of Jan Theeuwes at the VU University Amsterdam, investigating the neural correlates of visual spatial attention. His research particularly focused on preparatory effects of attention in early visual cortex and the role of irrelevant information within the attentional selection process.
