CONTENTS

Chapter 1	General introduction	7
Chapter 2	Improved detection of grey matter abnormalities	21
2.1	Multi-contrast, isotropic, single-slab 3D MR imaging in multiple sclerosis	23
2.2	Accumulation of cortical lesions in multiple sclerosis: Relation with cognitive impairment	41
Chapter 3	Hippocampal damage in multiple sclerosis: Detection and functional effects	57
3.1	Extensive hippocampal demyelination in multiple sclerosis	59
3.2	In vivo MR Imaging of hippocampal lesions in multiple sclerosis	81
3.3	Structural and functional hippocampal changes in multiple sclerosis patients with intact memory	97
Chapter 4	Analysis of putative causal relations between white matter and grey matter abnormalities	119
4.1	Grey and white matter atrophy in a large cohort of multiple sclerosis patients: Relation to MRI Parameters and impact on clinical disability	121
4.2	Regional DTI differences in multiple sclerosis patients	139
Chapter 5	Whole brain functional connectivity in multiple sclerosis patients	159
5.1	Resting state networks change in clinically isolated syndrome	161

Chapter 6	Summary, general discussion, future perspectives	185
	Nederlandse samenvatting	203
	Dankwoord	209
	Biography	213
	Bibliography	215
