# **Whiter shades of grey**

Clinical relevance of grey matter abnormalities as visualized by  
MRI in multiple sclerosis

**Stefan Roosendaal**

The studies described in this thesis were performed at the Department of Radiology, VU University Medical Center (VUmc), Amsterdam, the Netherlands. MS research at the VUmc is organized within the MS Center Amsterdam. The author of this thesis was financially supported by the Dutch MS Research Foundation (grant number 06-592).

Financial support for the publication of this thesis was kindly provided by: The Department of Radiology VUmc, the Dutch MS Research Foundation, Stichting Het Remmert Adriaan Laan Fonds, J.E. Jurriaanse Stichting, GE Healthcare Clinical Systems B.V., Biogen Idec International B.V., and Siemens Nederland N.V.

# Whiter shades of grey

Clinical relevance of grey matter abnormalities as visualized  
by MRI in multiple sclerosis

ACADEMISCH PROEFSCHRIFT

ter verkrijging van de graad Doctor aan  
de Vrije Universiteit Amsterdam,  
op gezag van de rector magnificus  
prof.dr. L.M. Bouter,  
in het openbaar te verdedigen  
ten overstaan van de promotiecommissie  
van de faculteit der Geneeskunde  
op donderdag 15 april 2010 om 11.45 uur  
in de aula van de universiteit,  
De Boelelaan 1105

door

**Stefan Dirk Roosendaal**

geboren te Hoorn

promotor: prof.dr. F. Barkhof  
copromotor: dr. J.J.G. Geurts

## CONTENTS

Chapter 1	<b>General introduction</b>	7
Chapter 2	<b>Improved detection of grey matter abnormalities</b>	21
2.1	Multi-contrast, isotropic, single-slab 3D MR imaging in multiple sclerosis	23
2.2	Accumulation of cortical lesions in multiple sclerosis: Relation with cognitive impairment	41
Chapter 3	<b>Hippocampal damage in multiple sclerosis: Detection and functional effects</b>	57
3.1	Extensive hippocampal demyelination in multiple sclerosis	59
3.2	In vivo MR Imaging of hippocampal lesions in multiple sclerosis	81
3.3	Structural and functional hippocampal changes in multiple sclerosis patients with intact memory	97
Chapter 4	<b>Analysis of putative causal relations between white matter and grey matter abnormalities</b>	119
4.1	Grey and white matter atrophy in a large cohort of multiple sclerosis patients: Relation to MRI Parameters and impact on clinical disability	121
4.2	Regional DTI differences in multiple sclerosis patients	139
Chapter 5	<b>Whole brain functional connectivity in multiple sclerosis patients</b>	159
5.1	Resting state networks change in clinically isolated syndrome	161

Chapter 6	<b>Summary, general discussion, future perspectives</b>	<b>185</b>
	<b>Nederlandse samenvatting</b>	<b>203</b>
	<b>Dankwoord</b>	<b>209</b>
	<b>Biography</b>	<b>213</b>
	<b>Bibliography</b>	<b>215</b>
