CONTENTS

Chapter 1
General introduction 7

First part
Transpulmonary thermodilution

Chapter 2
Clinical value of intrathoracic volumes from transpulmonary indicator dilution. 19

Chapter 3
Pulmonary artery thermodilution cardiac output vs transpulmonary
thermodilution cardiac output in two patients with intrathoracic pathology.

Chapter 4
Assessing fluid responses after coronary surgery: role of mathematical coupling
of global end-diastolic volume to cardiac output measured by transpulmonary
thermodilution.
Eur J Anaesthesiol 2009; 26: 954-960 45

Chapter 5
Transpulmonary versus continuous thermodilution cardiac output after valvular
and coronary artery surgery.
Interact CardioVasc Thorac Surg 2009; 9: 4-8 59

Chapter 6
Relative value of pressure and volumes in assessing fluid responsiveness after
valvular and coronary artery surgery.

Chapter 7
Cardiac filling volumes and pressures in assessing preload responsiveness upon
fluid challenges.
Hemodynamic support. Springer Verlag, Berlin 2009; pp 265-274 85
Second part

Pulse-contour

Chapter 8
Less invasive indicators of changes in thermodilution cardiac output by ventilator changes after cardiac surgery.

Chapter 9
Cardiac output measured by a new arterial pressure waveform analysis method without calibration compared with thermodilution after cardiac surgery.

Chapter 10
General discussion and summary

Chapter 11
Nederlandse samenvatting voor niet-ingewijden

Chapter 12
Nawoord
