Contents

	Introduction and outline of the thesis	9
Part I	Current management of diverticular disease	21
Chapter 1	Review of current classifications for diverticular disease and a translation into clinical practice	23
Chapter 2	Indications for elective sigmoid resection in diverticular disease	39
Chapter 3	Is age still of prognostic value in diverticular disease?	53
Chapter 4	Current surgical treatment of diverticular disease in The Netherlands	65
Part II	The Sigma-trial	77
Chapter 5	The Sigma-trial protocol: a prospective double-blind multi-center comparison of laparoscopic versus open elective sigmoid resection in patients with symptomatic diverticulitis	79
Chapter 6	Laparoscopic sigmoid resection for diverticulitis decreases major morbidity rates: a randomized control trial. Short-term results of the Sigma-trial	91
Chapter 6.1	Letter to the editor from Kehlet H and reaction	109
Chapter 6.2	Letter to the editor from Teeuwen PHE et al. and reaction	115
Chapter 7	Laparoscopic versus open elective sigmoid resection in diverticular disease: six months follow-up of the randomized control Sigma-trial	123
Chapter 8	The cost effectiveness of elective laparoscopic sigmoid resection for symptomatic diverticular disease, financial outcome of the randomized control Sigma-trial	137
	Summary and general discussion	153
	Nederlandse samenvatting	166
	Publications	173
	Contributing authors	175
	Dankwoord	177
	Curriculum Vitae	181
