Contents

	page
List of abbreviations	8
Chapter 1 General introduction	11
Chapter 2 An in vitro model for de- and remyelination using lysophosphatidyl choline in rodent whole brain spheroid cultures.	39
Chapter 3 Classically and alternatively activated macrophages differ in functional properties and the CNS cell types that attract them.	61
Chapter 4 Activation of Liver X Receptors by myelin induces the anti-inflammatory phenotype of foamy macrophages.	77
Chapter 5 The release of cytokines by macrophages is not affected by myelin ingestion.	93
Chapter 6 Phagocytosis and degradation of neurons by classically versus alternatively activated macrophages.	107
Chapter 7 Diverging effects of classically (M1) versus alternatively (M2) activated macrophages.	123
Chapter 8 In multiple sclerosis lesions macrophages display markers for both classically and alternatively activated phenotype.	139
Chapter 9 General discussion	157
Appendix Samenvatting voor niet-ingewijden	173
Dankwoord	179
Curriculum vitea	183
