TABLE OF CONTENTS

PREFACE	7
TABLE OF CONTENTS	9
CHAPTER 1 - INTRODUCTION	13
1.1 Context.....	13
1.2 Inland navigation.....	14
1.2.1 Importance	14
1.2.2 Literature overview.....	16
1.3 Climate change and inland navigation.....	17
1.4 Imbalances in inland navigation markets.....	21
1.5 Research questions, relevance and outline of the dissertation.....	23
CHAPTER 2 - PRODUCTION UNCERTAINTY IN THE INLAND NAVIGATION MARKET: CLIMATE CHANGE, OPTIMAL BARGE SIZE, AND INFRASTRUCTURE INVESTMENTS	25
2.1 Introduction	25
2.2 Theoretical framework.....	27
2.3 Equilibrium	30
2.4 Optimal barge size	31
2.5 Optimal infrastructure investments by government	33
2.6 Numerical welfare analysis	35
2.7 Conclusion	41
Appendix 2.A – Change in expected welfare.....	43
Appendix 2.B – Intermediate steps for optimal barge size example	43
Appendix 2.C – Table showing Dutch inland navigation fleet split up by tonnage	45
Appendix 2.D – More detailed regression output for the effective capacity estimation	45
CHAPTER 3 - A MATCHING MODEL FOR THE BACKHAUL PROBLEM	47
3.1 Introduction	47
3.2 Relationship with the literature.....	50

3.3 The matching model	53
3.3.1 The matching function	53
3.3.2 Bellman equations	55
3.3.3 Price determination in the long run.....	58
3.3.4 Steady-state equilibrium stocks and flows.....	59
3.3.5 Bargaining and conditions for positive backhaul prices	60
3.4 Numerical analysis	61
3.4.1 Calibration of the model	61
3.4.2 Delays in transport.....	63
3.5 Conclusion	66
Appendix 3.A – Proof that if $NH \geq NL$ then $SH \geq SL$	68
Appendix 3.B – Restrictions on asset values	69
Appendix 3.C – Derivation of Equations (3.5) and (3.6)	69
Appendix 3.D – Proof of Theorem 3.1 and that $p_H \geq p_L$	70
Appendix 3.E – Example where $p_L > p_H$ given increasing returns to scale	72
CHAPTER 4 - ENDOGENOUS FREIGHT PRICES AND TRADE IMBALANCES ...	75
4.1 Introduction	75
4.2 Methodology and data	79
4.2.1 Methodology.....	79
4.2.2 Data.....	82
4.3 Results	86
4.3.1 The effect of imbalance on the freight price	86
4.3.2 Sensitivity analyses.....	90
4.4 Conclusion	92
Appendix 4.A – Imbalance by region, I_i	95
Appendix 4.B – Descriptives of key variables of transports flows and trip data	95
Appendix 4.C – Distribution of distance navigated without cargo before starting a paid trip	96
CHAPTER 5 - CONCLUSION	97
5.1 Summary	97
5.2 Results and answers to the research questions	98
5.3 Policy implications for adaptation strategies	101
5.4 Recommendations for follow-up research	102
REFERENCES	105

NEDERLANDSE SAMENVATTING (SUMMARY IN DUTCH) - ECONOMISCHE MODELLEN VOOR DE BINNENVAART IN DE CONTEXT VAN KLIMAATVERANDERING.....	113
Samenvatting en onderzoeksresultaten	113
Beleidsimplicaties voor adaptatie.....	117
Aanbevelingen voor vervolgonderzoek.....	118
