promotoren: prof.dr. D.I. Boomsma
           prof.dr. H.A. Delemarre-van de Waal
           prof.dr. W.P.F. Fetter

copromotor:  dr. M. Bartels

9 Chapter 1 General introduction

23 Chapter 2 Body size in five-year-old twins: heritability and comparison to singleton standards
        Twin Research and Human Genetics. 2006; 9: 646-655

43 Chapter 3 Body size of twins compared with siblings and the general population: from birth to late adolescence

59 Chapter 4 Heritability of testis size

71 Chapter 5 Serum dehydroepiandrosterone-sulfate, insulin-like growth factor-I and insulin levels in late adolescence: the influence of genes, birth weight and catch-up growth
        Submitted

91 Chapter 6 A twin study of cognitive costs of low birth weight and catch-up growth

103 Chapter 7 General discussion

117 Chapter 8 Summary
        Samenvatting
