Contents

Summary	V
Nederlandse samenvatting	XI
1 General Introduction	1
2 Review of homogeneous, heterogeneous and biological oxidation of ferrous iron in drinking water treatment.	7
3 Concentration and size distribution of particles in abstracted groundwater	25
4 Mineralogy and generation of particles in anoxic groundwater abstracted from unconsolidated sedimentary aquifers	45
5 Cause and prevention of well bore clogging by particles	89
6 Prevention of well bore clogging by intermittent abstraction	107
7 Prevention of two types of well clogging requires two types of well operation	123
8 Well incrustation and well design criteria	141
9 Synthesis	173
References	183
Dankwoord	201
Curriculum vitae	203
