Contents

- Chapter 1** General introduction and outline of the thesis
- Chapter 2** Peri-operative bowel perforation in early stage colon cancer is associated with an adverse oncological outcome
- Chapter 3** Lymph node negative colorectal cancers with isolated tumor deposits should be classified and treated as stage III
- Chapter 4** High lymph node yield is related to microsatellite instability in colon cancer
- Chapter 5** Deletion of chromosome 4q predicts outcome in stage II colon cancer patients
- Chapter 6** Cell cycle proteins predict recurrence in stage II and III colon cancer
- Chapter 7** Prognostic scoring model using apoptosis regulating proteins in colon cancer.
- Chapter 8** Loss of Lamin A/C expression in stage II and III colon cancer is associated with disease recurrence
- Chapter 9** Lumican and Versican predict good outcome in stage II and III colon cancer
- Chapter 10** Summary and conclusions
- Appendices**
- I. Nederlandse samenvatting
 - II. List of publications
 - III. Dankwoord
 - IV. Curriculum vitae
