Contents

Chapter 1 General introduction and outline of thesis

Part I Tumor profiling in patients with colorectal cancer

Chapter 2 Candidate driver genes in focal chromosomal aberrations of stage II colon cancer
Chapter 3 Deletion of chromosome 4q predicts outcome in Stage II colon cancer patients
Chapter 4 Smoothing waves in array CGH tumor profiles
Chapter 5 Prognostic role of cell cycle proteins in stage II and III colon cancer: a large cohort multi-marker study

Part II Patient profiling and Risk scoring systems in patients with colorectal cancer

Chapter 6 Scoring systems for prediction of outcome in colon and rectal surgery
Chapter 7 POSSUM predicts decreased overall survival in curative resection for colorectal cancer.

Chapter 8 Summarizing discussion and future perspectives

Summary in Dutch
Curriculum Vitae and list of publications
