door

Barbara Marleen Bakker

geboren te Amsterdam

Promotor : prof.dr. H.V. Westerhoff
Copromotor : prof.dr. P.A.M. Michels

The research described in this thesis was supported by the Netherlands Organization for Scientific Research (NWO) and the Netherlands Association of Biotechnology Research Schools (ABON). The work was carried out in the BioCentrum Amsterdam, notably at the E.C. Slater Institute (Amsterdam) and the the Department of Microbiology of the Vrije Universiteit (Amsterdam), and at the Netherlands Cancer Institute (Amsterdam) and the Christian de Duve Institute of Cellular Pathology (Brussels). The publication of this thesis was supported by a generous gift from Solvay Pharmaceuticals.
