Contents

1	Introduction	1
1.1	Modeling and analysis of rare events	2
1.2	Rare events approximation and simulation	4
1.2.1	Importance sampling simulation	4
1.2.2	The cross-entropy method	5
1.2.3	Multilevel splitting methods	6
1.3	Types of rare events studied in this thesis	7
1.3.1	Reliability problem	7
1.3.2	Overflows in Jackson networks	8
1.3.3	Counting	9
1.3.4	Correlation function	9
1.4	Summary of the contribution of the thesis	10
2	Rare Event Simulation Methodologies	13
2.1	Formal definition of rare event	13
2.2	Monte Carlo simulation	16
2.3	The performance measures	17
2.4	Importance sampling	18
2.4.1	The cross-entropy method	22
2.5	Splitting method	25
3	Patching Algorithm	31
3.1	Introduction	31
3.2	Preliminaries	34
3.3	The Patching algorithm	36
3.3.1	Implementation issue: how to choose the parameters?	39
3.3.2	Discussion and comparisons	41
3.4	Face-dependent cross-entropy	45
3.4.1	The patching algorithm	47
3.4.2	Implementation issue: how to choose the parameters?	48
3.5	Numerical examples	50
3.5.1	Reliability	51

3.5.2	Jackson network	57
3.6	Summary and conclusions	64
4	Counting with Combined Splitting and Capture-Recapture Methods	65
4.1	Introduction	65
4.2	Splitting algorithms for counting	67
4.2.1	The basic adaptive splitting algorithm	69
4.2.2	Alternative counting estimator: The direct estimator	70
4.3	MCMC implementation	71
4.4	Combining splitting and Capture-Recapture	73
4.4.1	The classic Capture-Recapture	73
4.4.2	Splitting algorithm combined with Capture-Recapture	74
4.4.3	Extended Capture-Recapture method	74
4.5	Numerical results	76
4.5.1	The 3-Satisfiability problem (3-SAT)	76
4.5.2	Random graphs with prescribed degrees	80
4.5.3	Binary contingency tables	83
4.6	Concluding remarks	86
5	Markov fluid queues	89
5.1	Introduction	89
5.2	Model and preliminaries	91
5.2.1	Workload	91
5.2.2	Busy period	92
5.2.3	Correlation function	94
5.3	A Coupling-based algorithm	95
5.3.1	Algorithm	95
5.3.2	Coupling time	96
5.4	Performance of the Coupling-based estimator	97
5.4.1	Bound on the variance of the estimator	98
5.4.2	Discussion	102
5.5	Experimental results	103
5.6	Conclusion	107
6	Benford's Law	109
6.1	Introduction	109
6.2	Benford Markov chains and main tools	112
6.3	Sufficient condition that a Markov chain is Benford	116
6.4	Almost all finite-state Markov chains are Benford	123
6.5	Some computational implications	128
	Bibliography	135
