Contents

Chapter 1 7
Introduction

Chapter 2 23
The influence of fluticasone inhalation on markers of carcinogenesis in bronchial epithelium

Chapter 3 37
CT detected indeterminate pulmonary nodules in a chemoprevention trial of fluticasone

Chapter 4 51
The finding of pre-malignant lesions is not associated with smoking cessation in chemoprevention study volunteers

Chapter 5 69
Color fluorescence ratio for detection of bronchial dysplasia and carcinoma in situ

Chapter 6 87
Comprehensive CADM1 promoter methylation analysis in NSCLC and normal lung specimens

Chapter 7 103
Prognostic value of hTERT mRNA expression in surgical samples of lung cancer patients: the European Early Lung Cancer Project

Chapter 8 121
Discussion

Samenvatting 133
