List of abbreviations

CFO: collagen fiber orientation

HA: hydroxyapatite

HP: hydroxylysylpyridinoline

LP: lysylpyridinoline

Pen: pentosidine

PMMA: polymethylmethacrylate

TMD: tissue mineral density

TMJ: temporomandibular joint

VOI: volume of interest

Table of contents

Chapter 1	General introduction	9
Chapter 2	Age-related changes in microarchitecture and mineralization of cancellous bone in the porcine mandibular condyle	21
Chapter 3	Age-related changes in collagen properties and mineralization in cancellous and cortical bone in the porcine mandibular condyle	37
Chapter 4	The relationship between collagen cross-links and bone tissue stiffness in the porcine mandibular condyle	51
Chapter 5	The correlation between mineralization degree and bone tissue stiffness in the porcine mandibular condyle	67
Chapter 6	Higher number of pentosidine cross-links after ribose treatment does not alter tissue stiffness of cancellous bone	83
Chapter 7	The microstructural and biomechanical development of the mandibular condyle: a review	103
	Summary and conclusions	129
	Samenvatting en conclusies	133
	Dankwoord	137
	<i>Curriculum vitae</i>	147
	Reference list	149

This thesis is based on the following work:

- Willems NMBK, Mulder L, Langenbach GEJ, Grünheid T, Zentner A, van Eijden TMGJ (2007).
Age-related changes in microarchitecture and mineralization of cancellous bone in the porcine mandibular condyle.
Journal of Structural Biology 158(3):421–427.
- Willems NMBK, Langenbach GEJ, Everts V, Mulder L, Grünheid T, Bank RA, Zentner A, van Eijden TMGJ (2010).
Age-related changes in collagen properties and mineralization in cancellous and cortical bone in the porcine mandibular condyle.
Calcified Tissue International 86(4):307–312.
- Willems NMBK, Mulder L, Bank RA, Grünheid T, den Toonder JMJ, Zentner A, Langenbach GEJ (2011).
Determination of the relationship between collagen cross-links and the bone-tissue stiffness in the porcine mandibular condyle.
Journal of Biomechanics 44(6):1132–1136.
- Willems NMBK, Mulder L, den Toonder JMJ, Zentner A, Langenbach GEJ.
The correlation between mineralization degree and bone tissue stiffness in the porcine mandibular condyle. Conditionally accepted.
Journal of Bone and Mineral Metabolism.
- Willems NMBK, Langenbach GEJ, Stoop R, den Toonder JMJ, Mulder L, Zentner A, Everts V.
Higher number of pentosidine cross-links after ribose treatment does not alter tissue stiffness of cancellous bone. Submitted for publication.
- Willems NMBK, Langenbach GEJ, Everts V, Zentner A.
The microstructural and biomechanical development of mandibular condyle. Submitted for publication.
