<b>Samenvatting</b>	<b>xiii</b>
<b>Summary</b>	<b>xvii</b>
<b>1 Introduction</b>	<b>1</b>
1.1 The evolution of convergent orogens . . . . .	1
1.2 Deriving orogenic mechanics using thermochronology . . . . .	3
1.3 The low-topography Carpathian orogen . . . . .	3
1.4 Thesis outline . . . . .	6
<b>2 Low-temperature thermochronology</b>	<b>7</b>
2.1 Introduction . . . . .	7
2.2 Apatite fission track (AFT) thermochronology . . . . .	9
2.2.1 Fission track formation . . . . .	9
2.2.2 Age determination and calculation . . . . .	10
2.2.3 Stability and fading of tracks . . . . .	13
2.2.4 Laboratory and analytical procedures . . . . .	16
2.2.5 Statistical analysis of single grain age data . . . . .	17
2.3 Apatite (U-Th)/He (AHe) thermochronology . . . . .	18
2.3.1 $^4\text{He}$ ingrowth . . . . .	18
2.3.2 $^4\text{He}$ diffusion . . . . .	21
2.3.3 Analytical procedures $^4\text{He}$ extraction . . . . .	25
2.3.4 Analytical procedures U and Th analysis . . . . .	26
2.3.5 Blank corrections . . . . .	27
2.3.6 Durango apatite standard . . . . .	29
2.3.7 AHe age and error calculation . . . . .	30
2.3.8 Intra-sample variations in single crystal ages . . . . .	31

2.4	Deriving thermal histories and exhumation/denudation estimates from AFT and AHe data . . . . .	34
2.4.1	AFT annealing models . . . . .	34
2.4.2	AHe diffusion models . . . . .	36
2.4.3	Thermal modelling . . . . .	38
2.4.4	Conversion of time-temperature histories into exhumation / denudation estimates . . . . .	39
<b>3</b>	<b>Towards understanding the post-collisional evolution of an orogen influenced by convergence at adjacent plate margins: Late Cretaceous–Tertiary thermo-tectonic history of the Apuseni Mountains</b>	<b>41</b>
3.1	Introduction . . . . .	41
3.2	The Apuseni Mountains: a transitional orogen between the Carpathians and Dinarides . . . . .	42
3.2.1	Late Cretaceous tectonics and magmatism . . . . .	44
3.2.2	Post-Cretaceous evolution of the Apuseni Mountains and Transylvania Basin . . . . .	46
3.3	Thermochronology of the Apuseni Mountains . . . . .	46
3.3.1	Discussion of apatite fission track and (U-Th)/He data . . . . .	49
3.3.2	Thermal modelling . . . . .	55
3.4	Paleogene kinematics of the Apuseni Mountains in the vicinity of the Transylvania Basin . . . . .	55
3.4.1	The Mezeş Mountains and Vlădeasa Massif . . . . .	59
3.4.2	The transition between the Mezeş and Ticău mountains . . . . .	61
3.4.3	The area SW of Cluj-Napoca . . . . .	64
3.5	Late Cretaceous–Miocene exhumation and tectonics of the Apuseni Mountains . . . . .	64
3.5.1	Latest Cretaceous–Paleocene exhumation: “Laramian” thrusting and Banatitic magmatism . . . . .	65
3.5.2	Middle Eocene–Oligocene exhumation: thrusting along Mezeş and Puini thrusts . . . . .	67
3.5.3	Middle Miocene extension . . . . .	70
3.5.4	Late middle to late Miocene deformation and volcanism . . . . .	70
3.5.5	Latest Miocene–recent exhumation: inversion of the Transylvania Basin . . . . .	71
3.6	Conclusions . . . . .	71
<b>4</b>	<b>From nappe-stacking to out-of-sequence post-collisional deformations: Cretaceous to Quaternary exhumation history of the SE Carpathians assessed by low-temperature thermochronology</b>	<b>73</b>
4.1	Introduction . . . . .	73
4.2	Evolution of the East and SE Carpathians and kinematic constraints	76
4.2.1	Cretaceous convergence of Ceahlău-Severin . . . . .	76
4.2.2	Miocene contraction of the external East and SE Carpathians	77
4.3	Post-collisional deformation in the SE Carpathians . . . . .	79
4.4	Low-temperature thermochronology of the SE Carpathians . . . . .	80

4.4.1	Analytical results . . . . .	82
4.4.2	Thermochronological ages versus depositional age . . . . .	83
4.4.3	Thermal evolution of the SE Carpathians . . . . .	83
4.5	Interpretation and estimates on uplift and erosion, subsidence and sedimentation . . . . .	92
4.5.1	Cretaceous–Paleogene exhumation . . . . .	92
4.5.2	Miocene contraction and collision of the East and SE Carpathian nappes . . . . .	94
4.5.3	Late Miocene–Quaternary post-collisional evolution . . . . .	95
4.6	Particularities of SE Carpathian kinematics . . . . .	98
4.6.1	Paleogene exhumation of the SE Carpathians . . . . .	98
4.6.2	Collision mechanics . . . . .	98
4.6.3	Post-collisional exhumation and subsidence: what is driving it? . . . . .	99
4.7	Conclusions . . . . .	100
<b>5</b>	<b>Collisional characteristics of an orogen with low topographic build-up: Integration of the high-resolution exhumation history of the SE Carpathians at the scale of the entire Romanian Carpathians</b>	<b>103</b>
5.1	Introduction . . . . .	103
5.2	The Romanian Carpathians: framework of kinematics and collision	105
5.3	Overview of thermochronology data of the East, SE and South Carpathians . . . . .	107
5.3.1	AHe thermochronology results . . . . .	107
5.3.2	Discussion of AHe and AFT data . . . . .	107
5.3.3	Time-temperature histories for the East, SE and South Carpathians . . . . .	116
5.4	Exhumation and geometry during the Miocene collision of the Carpathians . . . . .	117
5.4.1	Miocene contraction and collision of the East and SE Carpathian nappes . . . . .	121
5.4.2	Latest Miocene–Quaternary post-collisional exhumation of the East and SE Carpathians . . . . .	124
5.4.3	Exhumation history of the South Carpathians . . . . .	124
5.5	Controls on the exhumation of the Romanian Carpathians and foreland-coupling collision . . . . .	125
