Contents

Part I: Introduction.....	1
Chapter 1: Introduction.....	3
1.1 Motivation.....	5
1.2 Research objectives.....	7
1.3 Methodology.....	9
1.4 Thesis outline.....	17
References.....	20
Part II: Modelling Emotion Contagion and Emotion Recognition	23
Chapter 2 - Agent-Based Modelling of Emotion Contagion in Groups	25
2.1 Introduction.....	26
2.2 Overall Architecture and Different Models Used.....	28
2.3 The Emotion Contagion Model	31
2.4 Simulation Results for Emotion Contagion.....	34
2.5 Mathematical Analysis for the Emotion Contagion Model.....	40
2.6 Formal Verification of the Emotion Contagion Spiral Model.....	45
2.7 The Ambient Agent Model for Group Emotion Analysis	50
2.8 The Agent Model for Group Emotion Support	54
2.9 Simulation Results of the Ambient Agent Model.....	59
2.10 Discussion.....	65
References.....	67
Chapter 3 - Do Positive Emotions Broaden the Thought Action Repertoire, Creativity and Memory? A Replication and Extension Study....	71
3.1 Introduction.....	72
3.2 Method	75
3.3 Results.....	80
3.4 Discussion.....	89
References.....	92
Chapter 4 - Detecting changing emotions in human speech by machine and humans	95

4.1	Introduction.....	96
4.2	Method	97
4.2.4	Training sets	100
4.2.5	Modelling data with Random Forests.....	101
4.3	Results.....	102
4	Validation Experiment.....	104
4.5	Results.....	109
4.6	Visualisation.....	116
4.6.1	Dimensional theory of emotion	117
4.6.2	PCA analysis of research data	119
4.7	Conclusion	122
4.8	Discussion.....	125
Part III: Integrated Modelling of Social Contagion and Internal Dynamics.....		129
Chapter 5 - Agent-Based Modelling of the Emergence of Collective States Based on Contagion of Individual States in Groups.....		131
5.1	Introduction.....	132
5.2	Some Underlying Neurological Principles	134
5.3	A Generic Agent-Based Model for Social Diffusion of Individual States	136
5.4	Modelling the Dynamics of Intentions and Emotions in Groups	137
5.5	Simulation Results: Interaction Between Intentions and Emotions.....	139
5.6	Verification of Properties Specifying Emerging Patterns	142
5.7	Modelling the Dynamics of Beliefs and Emotions in Groups.....	145
5.8	Simulation Results: Interaction Between Beliefs and Emotions..	147
5.9	Mathematical Analysis of Equilibria and Monotonicity.....	152
5.10	Discussion.....	157
	References.....	158

Chapter 6 - Modelling Collective Decision Making in Groups and Crowds: Integrating Social Contagion and Interacting Emotions, Beliefs and Intentions.....	163
6.1 Introduction.....	164
6.2 Background from Social Neuroscience	165
6.3 A Computational Model for Mirroring of Mental States.....	167
6.4 Modelling the Interplay of Beliefs, Emotions and Intentions.....	169
6.5 Some Example Simulation Results for a Fictional Case Study	174
6.6 Extending and Specialising ASCRIBE for the May 4 Case.....	182
6.7 The Parameter Tuning Method Used	184
6.8 Results.....	185
6.9 Comparison to an epidemiological-based contagion model.....	195
6.10 Discussion.....	197
References.....	200
Chapter 7- Analysis of Beliefs of Survivors of the 7/7 London Bombings: Application of a Formal Model for Contagion of Mental States	205
7.1 Introduction.....	206
7.2 London Bombings	207
7.3 Formalisation of Survivor Statements	207
7.4 Simulation Model.....	213
7.5 Simulation Results.....	216
7.6 Formal Comparison.....	217
7.7 Discussion	218
Acknowledgements	219
References.....	219
Part IV: Integrated Modelling of Contagion and Regulation of Negative Mood	221
Chapter 8 - Modelling Caregiving Interactions During Stress	223
8.1 Introduction.....	224
8.2 Underlying Principles in Informal Caregiving Interactions.....	225
8.3 Modeling Approach.....	226

8.4	Simulation Results.....	228
8.5	Mathematical Analysis.....	231
8.6	Formal Verification of the Model	232
8.7	Conclusion	235
	References.....	236
Chapter 9 - An Ambient Agent Model for Support of Informal Caregivers During Stress.....		
		239
9.1	Introduction.....	240
9.2	A Domain Model for Caregiving Interactions During Stress	240
9.4	Concepts and Effects in Support for Informal Caregivers.....	247
9.5	Simulation Results.....	251
9.6	Verification of the Simulation Results	255
9.7	Discussion.....	256
	References.....	257
Chapter 10 - An Agent-Based Model for Integrated Contagion and Regulation of Negative Mood.....		
		259
10.1	Introduction.....	260
10.2	Mood Contagion and Regulation	260
10.3	The Agent-Based Model.....	262
10.4	Simulation Results	268
10.5	Mathematical Analysis.....	271
10.6	Discussion.....	274
	References.....	275
Part V: Modelling Team and Leadership Dynamics		
277		
Chapter 11 - Computational Model-Based Design of Leadership Support Based on Situational Leadership Theory.....		
		279
11.1	Introduction.....	280
11.2	A Model for Dynamics of Development Levels.....	282
11.3	The Leadership Support Model.....	288
11.4	Simulation Results	294
11.5	Discussion.....	297

References.....	298
Chapter 12 - Crisis Management Evaluation: Formalisation & Analysis of Communication during Fire Incident in Amsterdam Airport Train Tunnel.....	301
12.1 Introduction.....	302
12.2 Schiphol Tunnel Fire.....	303
12.3 Formalisation of Crisis Management Communication	304
12.4 Automatic Property Checking	307
12.5 Discussion.....	311
Acknowledgements	312
References.....	312
Part VI: Discussion.....	315
Chapter 13: Discussion.....	317
13.1 Results	317
13.2 Implications, strengths and limitations of the current research	321
13.3 Future Work	325
References.....	327
Curriculum Vitae	331
Nederlandse Samenvatting	333
SIKS Dissertation Series	335
Appendices	350
Appendix A Settings for the Scenarios in Section 5.5.....	350
Appendix B Settings for the Scenarios in Section 5.8	353
