# Table of Contents

Chapter 1: General introduction  
Periodontitis and *Porphyromonas gingivalis* 2  
The host response 5  
Aim and thesis outline 10

Chapter 2: Gingival and periodontal ligament fibroblasts differ in their inflammatory response to viable *Porphyromonas gingivalis* 17

Chapter 3: Periodontal ligament and gingival fibroblasts from periodontitis patients are more active in interaction with *Porphyromonas gingivalis* 39

Chapter 4: The capsule of *Porphyromonas gingivalis* reduces the immune response of human gingival fibroblasts 59

Chapter 5: Diverse effects of *Porphyromonas gingivalis* on human osteoclast formation 81

Chapter 6: General discussion  
Periodontitis, *P. gingivalis*, and fibroblasts 102  
GF and PDLF respond differently to viable *P. gingivalis* in periodontitis and health 103  
The *P. gingivalis* polysaccharide capsule and interaction with host cells 105  
*P. gingivalis* and osteoclast formation 106  
Concluding remarks and future perspectives 107

Chapters 7, 8: General abstracts  
General abstract 114  
Algemene samenvatting 116

Chapter 9: Dankwoord (acknowledgements) 119

Appendix A: List of Abbreviations 126
