Content
Foreword

Introduction

1. Police shooting in The Netherlands: incident rate, practice, and examination
2. Anxiety and perceptual-motor performance: toward an integrated model of concepts, mechanisms, and processes

A. Threat-related attention

3. Effects of anxiety on handgun shooting behavior of police officers: a pilot study
4. Training with anxiety: short- and long-term effects on police officers' shooting behavior under pressure

B. Threat-related interpretation

5. Shoot or don't shoot? Why police officers are more inclined to shoot when they are anxious
6. Effects of anxiety on police officers' shooting behavior: anxiety, action specificity, and affective influences on perception
7. When practice fails: persistence of errors in police officers' shooting decisions under anxiety

C. Threat-related responses

8. Sitting duck or scaredy cat? How avoidance influences accuracy in police officers' shooting performance under threat
9. Quantifying police officers' arrest and self-defense skills: does performance decrease under pressure?
Epilogue
10. Effects of anxiety on police officers’ shooting behavior under pressure: summary, conclusions, and directions for future research 170
11. Practical implications 178
