# **TABLE OF CONTENTS**

Chapter 1	General introduction and outline of this thesis	9
PART 1	METABOLISM OF ARGININE, GLUTAMINE AND CITRULLINE AROUND SURGERY AND CRITICAL ILLNESS	29
Chapter 2	Preoperative oral nutritional interventions in surgery, including arginine and glutamine-enhanced supplements.	31
Chapter 3	Evaluation of a new concept of immune-enhancing diet in a model of head-injured rat with infectious complications: a proof of concept study.	55
Chapter 4	Enteral glutamine administration in critically ill non-septic patients does not trigger arginine synthesis: a quantitative study.	75
Chapter 5	Intravenous glutamine supplementation enhances renal de novo arginine synthesis in humans; a stable isotope study.	97
Chapter 6	Perioperative intravenous glutamine supplementation restores the disturbed arginine synthesis after ischemia-reperfusion injury caused by open abdominal aortic surgery, a randomized controlled clinical trial	113
PART II	IMPLICATION OF ARGININE-ADMA-NO PATHWAY IN THE DISEASED STATE	135
Chapter 7	General introduction of Part II	137
Chapter 7 Chapter 8	General introduction of Part II  Asymmetric dimethylarginine (ADMA) and critical illness.	137 145
•		
Chapter 8	Asymmetric dimethylarginine (ADMA) and critical illness.  The arginine/ADMA ratio is related to the prevention of atherosclerotic plaques in hypercholesterolemic rabbits when giving a combined therapy with	145
Chapter 8 Chapter 9	Asymmetric dimethylarginine (ADMA) and critical illness.  The arginine/ADMA ratio is related to the prevention of atherosclerotic plaques in hypercholesterolemic rabbits when giving a combined therapy with atorvastatine and arginine.  Strict glucose control and artificial regulation of the NO–ADMA–DDAH system	145 159
Chapter 8 Chapter 9 Chapter 10	Asymmetric dimethylarginine (ADMA) and critical illness.  The arginine/ADMA ratio is related to the prevention of atherosclerotic plaques in hypercholesterolemic rabbits when giving a combined therapy with atorvastatine and arginine.  Strict glucose control and artificial regulation of the NO–ADMA–DDAH system in order to prevent endothelial dysfunction.	145 159 175
Chapter 8 Chapter 9 Chapter 10 Chapter 11	Asymmetric dimethylarginine (ADMA) and critical illness.  The arginine/ADMA ratio is related to the prevention of atherosclerotic plaques in hypercholesterolemic rabbits when giving a combined therapy with atorvastatine and arginine.  Strict glucose control and artificial regulation of the NO–ADMA–DDAH system in order to prevent endothelial dysfunction.  Summary, discussion, general conclusion and future perspectives	145 159 175 181
