TABLE OF CONTENTS

Chapter 1	General introduction.	9
Part 1 Maternal pregnancy health and the offspring's early growth		
Chapter 2	Relation of maternal hypertension with infant growth in a prospective birth cohort.	17
Part 2 Validation of assessment of body composition, one of the outcome measures		
Chapter 3	Validation of total body water analysis by bioelectrical impedance analysis with deuterium dilution in (pre)school children.	33
Part 3 Associations of early growth and infant feeding with childhood cardiovascular risk factors		
Chapter 4	Associations of infant feeding and timing of weight gain and linear growth during early life with childhood blood pressure: findings from a prospective population based cohort study.	43
Chapter 5	Associations of infant feeding and timing of linear growth and relative weight gain during early life with childhood body composition.	67
Chapter 6	Associations of infant feeding and timing of growth in early life with childhood glucose and lipid biomarkers.	93
Chapter 7	General discussion	119
	Reference list	135
	List of abbreviations	151
	Dankwoord	155
	List of publications	159
	About the author	161
