WATER AND ION HOMEOSTASIS IN THE DEVELOPING BRAIN:
USING DISEASE MODELS TO UNDERSTAND PHYSIOLOGY

A STUDY OF MEGALENCEPHALIC LEUKOENCEPHALOPATHY WITH
SUBCORTICAL CYSTS (MLC)

Mohit Dubey
The studies in this thesis were performed at the department of Pediatrics/Child Neurology, VU University Medical Center and Department of Integrative Neurophysiology, VU University, Amsterdam, The Netherlands. The work was financially supported by E-Rare and ZonMw (E-Rare Joint Transnational Call 2009, ZonMw grant number 11-330-1024). Financial supporting for printing of this thesis was kindly provided by the department of Pediatrics, VU University Medical Center, Amsterdam, The Netherlands.
