Contents

I  Uniform probability measures  7
  1  Introduction  9
  2  Uniform probability measure on $\mathbb{N}$  13
    2.1  Introduction and main results .......................... 13
    2.2  Weak thinnability ...................................... 16
    2.3  The pair $(A^{\text{uni}}, \alpha)$ .......................... 18
    2.4  Generalization to metric spaces ........................ 19
    2.5  Proofs .................................................. 22
    2.6  Discussion .............................................. 36

  3  The supertask of an infinite lottery  39
    3.1  The supertask ............................................. 39
    3.2  The mathematical model .................................. 41
    3.3  Discussion .............................................. 44

II  Epistemic probability  47
  4  Introduction  49
  5  Conditioning and independence  59
    5.1  Contingent conditioning .................................. 59
    5.2  Necessary conditioning ................................... 64
    5.3  Mixed conditioning ....................................... 65
    5.4  Independence ............................................. 67
    5.5  Dempster’s rule of combination .......................... 72
    5.6  A law of large numbers .................................. 74

  6  A betting interpretation  77
    6.1  Betting functions and degrees of belief .................. 77
    6.2  Adding B-consistency ................................. 80
6.3 Discussion ......................................................... 88
6.4 Contingent conditioning ........................................... 89
6.5 Necessary conditioning ............................................ 93
6.6 Strong independence .............................................. 95

7 Assessing forensic evidence ....................................... 99
7.1 The island problems ............................................... 99
   7.1.1 The cold case ............................................. 99
   7.1.2 The search case ......................................... 102
7.2 Parental identification ........................................... 104
7.3 Discussion and legal practice ................................... 107

8 Infinite regress ..................................................... 111
8.1 Introduction and motivation .................................... 111
8.2 Finite epistemic regress ......................................... 114
8.3 Belief functions on infinite spaces .............................. 120
   8.3.1 Continuous belief functions? ............................ 123
8.4 Infinite epistemic regress ......................................... 125
   8.4.1 Three examples of infinite epistemic regress ............ 125
   8.4.2 Bounds for the various forms of conditioning ........... 129
   8.4.3 Proofs of the bounds in Section 8.4.2 .................. 130

Summary ................................................................. 135

Bibliography .......................................................... 137
