CONTENT

Chapter 1 General Introduction

Chapter 2 Air powder abrasive treatment as an implant surface cleaning method: Literature review

Chapter 3 Cleaning and modification of intraorally contaminated titanium discs with calcium phosphate abrasive treatment.

Chapter 4 Cleaning effect of osteoconductive powder abrasive treatment on explanted human implants and biofilm coated titanium discs.

Chapter 5 Re-establishment of the reduced biocompatibility of the in vitro contaminated titanium surface using osteoconductive powders with air abrasive treatment.

Chapter 6 Re-osseointegration following a surgical peri-implantitis treatment using osteoconductive powder abrasive treatment in a beagle dog model

Chapter 7 The parameters that improve the cleaning efficiency of sub-gingival air polishing on titanium implant surfaces: An in-vitro study.

Chapter 8 General Discussion and Summary

Appendices About the Author
