CONTENTS

Preface 9

Chapter 1 General introduction 15

PART ONE
How to improve the triage of high-risk HPV-positive women

Chapter 2 Comparing triage algorithms using HPV DNA genotyping, HPV E7mRNA detection and cytology in high-risk HPV DNA-positive women

Chapter 3 p16/Ki-67 dual-stained cytology for detecting cervical (pre)cancer in a high-risk HPV-positive gynecologic outpatient population
Modern Pathology 2016; 29: 870-878 71

Chapter 4 Comparing the performance of FAM19A4 methylation analysis, cytology and HPV16/18 genotyping for the detection of cervical (pre)cancer in high-risk HPV-positive women of a gynecologic outpatient population (COMETH study)
International Journal of Cancer 2015; 138: 992-1002 87

Chapter 5 FAM19A4 methylation analysis in self-collected samples compared to physician-taken cervical scrapes for detection of cervical (pre)cancer in high-risk HPV-positive women
PART TWO
The prevalence and clinical relevance of HPV in semen

Chapter 6  Presence of human papillomavirus in semen of healthy men is firmly associated with HPV infections of the penile epithelium
Fertility & Sterility 2015; 104: 838-844

Chapter 7  Presence of human papillomavirus in semen in relation to semen quality
Human Reproduction 2016; 31: 280-286

Chapter 8  General discussion
Part one of this discussion has been adapted from ‘Management of high-risk HPV-positive women for detection of cervical (pre) cancer’ Expert Reviews of Molecular Diagnostics 2016; 16: 961-974

Chapter 9  Summary & Samenvatting
