Contents

Chapter 1	General introduction and outline of the thesis	15
Chapter 2	ENerGetlcs in hypertrophic cardiomyopathy: traNslation between MRI, PET and cardiac myofilament function (ENGINE study) <i>Neth Heart J 2013; 21:567-571</i>	25
Chapter 3	Gene-specific increase in the energetic cost of contraction in hypertrophic cardiomyopathy caused by thick filament mutations <i>Cardiovasc Res 2014; 103:248-257</i>	37
Chapter 4	Myocardial efficiency is an important determinant of functional improvement after aortic valve replacement in aortic valve stenosis patients: a combined PET and CMR study <i>Eur Heart J Cardiovasc Imaging 2015; 16:882-889</i>	63
Chapter 5	Left ventricular outflow tract gradient is associated with reduced capillary density in hypertrophic cardiomyopathy irrespective of genotype <i>Eur J Clin Invest 2015; 45:1252-1259</i>	83
Chapter 6	Disease stage-dependent changes in cardiac contractile performance and oxygen utilization underlie reduced myocardial efficiency in human inherited hypertrophic cardiomyopathy <i>Circ Cardiovasc Imaging 2017; Epub ahead of print</i>	99
Chapter 7	Summary and future perspectives	123
Chapter 8	Nederlandse samenvatting	129
Appendix	Dankwoord	138
	List of publications	142
	Biography	145
