Contents

Acknowledgments	v
List of Tables	xiii
List of Figures	xv
1 Introduction	3
1.1 Score driven filtering framework	4
1.1.1 Modeling dynamic correlations	6
1.2 Intuitive properties of GAS models	10
1.3 Outline of thesis	15
2 A Stochastic Recurrence Equations Approach	19
2.1 Introduction	20
2.2 Score driven models for correlations	23
2.3 Contraction conditions	26
2.4 Asymptotic properties of the maximum likelihood estimator	33

CONTENTS

2.5	Numerical and empirical results	36
2.5.1	Numerical results	36
2.5.2	Empirical illustration	40
2.6	Concluding remarks	46
2.A	Proofs	49
2.B	Student's t updating recursion driven by i.i.d. noise	58
2.C	Further numerical results	61
2.D	Complementary results to the empirical application	64
2.D.1	FTSE: Diagnostic checks on the univariate models in the GJR family	64
2.D.2	Athex Composite Index: Diagnostic checks on the univariate models in the EGARCH family	65
2.D.3	Robustness check: Modeling both marginals by an EGARCH(1,2) model	66
3	Dynamic Equicorrelation Models	71
3.1	Introduction	72
3.2	Dynamic equicorrelation models	76
3.2.1	The model and its quasi-likelihood function	76
3.2.2	DCC-DECO dynamics	79
3.2.3	GAS-DECO dynamics	79
3.2.4	Comparison of GAS-DECO and DCC-DECO dynamics	88

CONTENTS

3.3	Statistical Properties of the GAS-DECO Model	92
3.3.1	Stationarity and ergodicity of the simulated model	93
3.4	Simulation evidence	98
3.5	Empirical applications	100
3.5.1	S&P500 equity returns	100
3.5.2	A joint model to extract information from options data	104
3.6	Conclusion	116
3.A	Proofs	117
3.B	Supplemental information	128
4	Adapting Filtering Equations to Misspecification	135
4.1	Introduction	136
4.2	Adapting observation driven filters to misspecification	139
4.3	The tvGAS model	142
4.3.1	Monte Carlo evidence	145
4.3.2	Illustration: Bivariate correlation between UK and Greek equity indices	150
4.4	Asymmetry in the volatility news impact curve	156
4.5	Conclusion	163
5	Predictive Systems and Dynamic Spillovers	165
5.1	Introduction	166

CONTENTS

5.2	Dynamic spillover models	170
5.2.1	Variance decomposition networks	170
5.2.2	Descriptive spillover measures	171
5.2.3	Multivariate location dynamics	173
5.3	Return spillovers	175
5.3.1	Multivariate scale dynamics	175
5.3.2	Statistical evaluation of alternative VAR models	177
5.3.3	Spillover implications of alternative VAR models	184
5.4	Volatility spillovers	193
5.4.1	Multivariate scale dynamics	194
5.4.2	Statistical evaluation of alternative VAR models	196
5.4.3	Spill-over implications of alternative VAR models	202
5.5	Conclusions	208
5.A	Return Spillovers	209
5.B	Volatility Spillovers	211
5.C	Handling missing observations	214
6	Conclusion	217

CONTENTS

6.1	Summary of contributions	217
6.2	Further extensions	220
