Contents

Chapter 1	General introduction and outline of the thesis.	9
<u>Part I: Different myofilament remodeling and function between patient groups</u>		
Chapter 2	Peripartum cardiomyopathy and dilated cardiomyopathy: Different at heart. <i>Frontiers in Physiology (2015)</i>	27
Chapter 3	Myofilament remodeling and function is more impaired in peripartum cardiomyopathy compared to dilated cardiomyopathy and ischemic heart disease. <i>The American Journal of Pathology (2017)</i>	47
Chapter 4	Cardiomyocyte hypocontractility and reduced myofibril density in pediatric cardiomyopathy. <i>Submitted</i>	77
<u>Part II: Pathogenic effects of mutations in dilated cardiomyopathy</u>		
Chapter 5	A mutation in the glutamate-rich region of RNA-binding motif protein 20 causes dilated cardiomyopathy through missplicing of titin and impaired Frank-Starling mechanism. <i>Cardiovascular Research (2016)</i>	99
Chapter 6	<i>Lamin A/C</i> -related cardiac disease: Late onset with a variable and mild phenotype in a large cohort of patients with the <i>LMNA</i> p.(Arg331Gln) founder mutation. <i>Circulation Cardiovascular Genetics (2017)</i>	127
Chapter 7	Genotype-specific pathogenic effects in human dilated cardiomyopathy. <i>Journal of Physiology (2017)</i>	169
<u>Part III: Discussion and summary of thesis</u>		
Chapter 8	Summary of thesis and future perspectives.	199
Chapter 9	Nederlandstalige samenvatting.	217
Appendix	Curriculum vitae.	226
	List of publications.	228
	Acknowledgements/Dankwoord.	230
