Contents

Summary **vii**

Samenvatting **xv**

Contents **xxiii**

Glossary of terms & abbreviations **xxix**

1 **Introduction** **1**

2 **Nitrogen Deposition: from source to effect** **5**

2.1 The nitrogen issue 6

2.2 Sources of Nitrogen 8

2.2.1 Emissions of reduced nitrogen 8

2.2.2 Emissions of oxidised nitrogen 12

2.2.3 Combustion processes 13

2.2.4 Soil emissions 14

2.2.5 Trend in nitrogen emissions 15

2.2.6 Transport and deposition 16

2.2.6.1 Chemical conversion 17

2.2.6.2 Wet deposition 19

2.2.6.3 Dry deposition 20

2.2.7 Quantifying nitrogen deposition 22

2.2.7.1 Measurements 22

2.2.7.2 Modelling 26

2.3 Effects related to nitrogen deposition 27

2.4 Policies related to nitrogen deposition 29

2.4.1 Policies targeting nitrogen atmospheric emissions and concentrations 29

2.4.2 Policies targeting nitrogen effects 30

2.5 Objective of this thesis and overview of next chapters 30

3 **Intercomparison of throughfall measurements** **33**

3.1 Introduction 35

3.2	Site description and overview	36	
3.3	Meteorological conditions during the field intercomparison		38
3.4	Methods and procedures	38	
3.4.1	Sample equipment used	38	
3.4.2	Samplers used in the comparison	41	
3.4.3	Chemical analysis and data quality	43	
3.5	Results of the intercomparison study	45	
3.6	Evaluation of the results	48	
3.6.1	Spatial representativity of throughfall measurements		48
3.6.1.1	Number of collectors required	48	
3.6.1.2	Total collecting area	48	
3.6.1.3	Sampler placement	49	
3.6.2	Determination of throughfall volumes	49	
3.6.3	Determination of throughfall concentrations	49	
3.7	Discussion and conclusions	52	
3.7.1	Spatial representativity of the throughfall measurements		54
3.7.2	Determination of throughfall volumes	54	
3.7.3	Determination of throughfall concentrations	54	
3.7.4	Relative importance of the different error sources	55	
3.7.5	Recommendations for future field intercomparisons	57	
4	Modelling the nitrogen deposition to afforested systems		59
4.1	Introduction	61	
4.2	Nitrogen deposition: from source to receptor	61	
4.2.1	Emission of nitrogen	62	
4.2.2	Transport and deposition of nitrogen	63	
4.3	Changing emission/deposition patterns due to afforestation		67
4.3.1	Effects due to land use changes	67	
4.3.1.1	Removal of emission due to afforestation	67	
4.3.1.2	Changing deposition characteristics	68	
4.3.2	Changing deposition patterns due to growing trees	68	

4.3.3	Spatial interaction between source and receptor	71
4.4	Nitrogen deposition in the AFFOREST-sDSS	74
4.4.1	Methodology of deposition calculation	74
4.4.1.1	Emissions	74
4.4.1.2	Calculating initial deposition	75
4.4.1.3	Correction for land use change	78
4.4.1.4	Correction for 'growing trees' and changing deposition characteristics	81
4.4.1.5	Deposition to afforested land	83
4.4.2	Comparison with measurements and other calculation results	83
5	Linking ammonia emission trends to measured concentrations and deposition	87
5.1	Introduction	89
5.2	Important findings from the previous review	91
5.2.1	Case studies: linking agricultural sector activity and atmospheric NH _x	91
5.2.2	Case studies: linking NH ₃ emission abatement and atmospheric NH _x	94
5.2.3	Bern background document: Main conclusions	96
5.3	Current status of studies for verification	97
5.3.1	European ammonia emissions	97
5.3.2	Country specific case studies	98
5.3.2.1	The Netherlands	99
5.3.2.2	United Kingdom	103
5.3.3	European overview	111
5.4	Discussion and conclusions	117
5.4.1	Have the conclusions changed between the first assessment (BBD) and the results presented here?	117
5.4.2	Are the measurements adequate to assess the emission reductions of reduced nitrogen?	121
6	Nitrogen deposition as a threat to biodiversity	125
6.1	Introduction	127

6.2	Global N deposition rates	130
6.3	Classification of the PAs	131
6.4	PAs under threat of N deposition	134
6.5	Discussion and Conclusions	139
7	Spatial planning as a tool for decreasing nitrogen loads	145
7.1	Introduction	147
7.2	Methods	150
7.2.1	Optimisation method	150
7.2.2	Critical loads	150
7.3	Optimisation of NH ₃ emissions for different scenarios	152
7.4	Conclusions	157
8	Overview on uncertainties in measuring and modelling nitrogen deposition	159
8.1	General discussion on uncertainty issues	162
8.1.1	Measurements	163
8.1.2	Modelling	165
8.2	How can we determine nitrogen deposition levels and their trends in time?	166
8.2.1	Measurements	167
8.2.1.1	Plot scale	167
8.2.1.2	Landscape scale	167
8.2.1.3	National scale	168
8.2.1.4	Lessons learned	169
8.2.2	Modelling	170
8.2.3	Trends in nitrogen deposition	171
8.3	What is the uncertainty in nitrogen depositions on different spatial scales and what are the factors influencing it?	172
8.4	How does the uncertainty in the nitrogen depositions affect the relation with effects such as biodiversity and exceedance of critical loads?	176
8.5	How can this affect current and future policies?	178

8.6	Does uncertainty prevent politicians from taking actions?	180
8.7	Final remarks	181
9	Conclusions	183
	References	189
	List of publications	213
	Acknowledgement & Curriculum Vitae	223
