Curriculum Vitae

Marleen van Tetering was born on March 25th, 1991 in Breda (The Netherlands). She completed pre-university education at Markland College, Oudenbosch (2009). After that, she obtained her Propedeuse in Midwifery (2010), and started studying Psychology at Maastricht University. She obtained her Bachelor in Psychology (2013) and a Master in Neuropsychology (2014). During this period, she studied abroad at Sydney University (2013) and conducted a combined research and clinical internship at the department of Psychiatry & Neuropsychology (Maastricht University) and at the Maastricht University Medical Center+. After study completion, Marleen worked as a junior researcher at the Center for Brain & Learning at the Vrije Universiteit. She worked on educational intervention programs for children and young adolescents that stimulate the development of spatial reasoning and neuropsychological abilities (BrainSquare, in Dutch: BreinPlein). Together with these experiences, she officially started her PhD research at the Vrije Universiteit in August 2015. Within this period, she was the research fellow of prof.dr. Jelle Jolles (2015). The results of the research are described in this thesis. Currently, she is writing a book with prof.dr. Jelle Jolles for teachers, parents and students. In this book, learning materials and instructions are provided that stimulate neuropsychological development and spatial reasoning in children and adolescents.
