Contents

Chapter 1

General introduction9

Chapter 2

Patterning factors during neural progenitor induction determine regional identity and differentiation potential37

Chapter 3

Multi-level characterization of balanced inhibitory-excitatory cortical neuron network derived from human pluripotent stem cells63

Chapter 4

Hyperactive neuronal network with defective neuronal and oligodendrocyte properties in Tuberous sclerosis complex (TSC) patient iPSC-based models99

Chapter 5

Engraftment analysis of TSC iPSC-derived neurons and glial cells in mouse brain129

Chapter 6

General discussion147

Summary165

List of publications167

Acknowledgements169
